

YAAZ®

beauty.
nature.
soul.

beauty. nature. soul.

Nature is our
greatest home
and a timeless
source of
inspiration not
just for its
visual beauty
but also as a
philosophical
approach to life.

Furniture design with a strong visual identity that invites conviviality. A fusion of functionality, innovation, and beauty that strikes a perfect balance between timeless elegance and contemporary dynamism.

Every YAAZ product is the result of a constant quest for innovation, where advanced technical solutions are combined with a design that responds to the needs of the people who live in the spaces. The combination of premium materials and cutting-edge technology results in beautifully crafted products, with intelligent design solutions and refined finishes that enhance both ease of use and contemporary beauty.

YAAZ offers a complete furniture collection, designed in Italy to integrate perfectly into any type of architectural space, both indoor and outdoor. Whether for private residences, luxury hotels, exclusive resorts, elegant workspaces, expansive gardens or high-class yachts, YAAZ products are ideal for transforming any environment into a refined and welcoming space.

The YAAZ factory operates at the highest standards of excellence, combining advanced numerical control technologies and high craftsmanship to create products that meet the highest standards of the global market.

YAAZ:

draws energy from the sun
and inspiration from nature.

sustainability

YAAZ Sustainability Strategy & Environmental Management

Data is collected and stored in accordance with ISO 9001:2015, ISO 14001:2015, ISO 45001:2018, and ISO 10002:2018 quality management systems.

Greenhouse Gas Reduction Initiatives

YAAZ plans and implements various initiatives to reduce or prevent greenhouse gas emissions. Through these efforts, the company aims to measure and assess emission reductions achieved as a result of its greenhouse gas mitigation and removal strategies. YAAZ is committed to protecting the environment and creating value for society within the framework of its sustainability vision. To achieve this, the company has established three key pillars of sustainability: Environmental Responsibility, Social Impact, and Corporate Governance.

Sustainable Material Use: YAAZ aims to reduce its carbon footprint by promoting the use of recyclable and environmentally friendly materials in production processes. Sustainability principles are also prioritized in supplier selection.

Digitalization and Paper Reduction: YAAZ seeks to minimize paper consumption by digitalizing processes related to purchasing and sales. This initiative not only reduces material waste but also enhances investments in digital infrastructure.

Green Office Practices: To improve energy efficiency in office spaces, YAAZ is implementing green office practices, increasing greenery, and encouraging employees to adopt energy-saving behaviors.

Zero Waste Program: YAAZ is committed to minimizing waste and increasing recycling rates by providing the necessary infrastructure and training. The company sets targets to achieve zero waste in its production processes.

Carbon Footprint Analysis: YAAZ will conduct regular annual carbon footprint assessments to identify areas for improvement. Progress and strategy effectiveness will be monitored through annual reports.

Social Awareness Projects: The company will organize social awareness initiatives, seminars, and interactive events to educate the community on reducing carbon emissions.

Cleaner Fuel Use: YAAZ aims to lower carbon emissions by transitioning to low-emission fuels.

Energy Management: In pursuit of lower electricity consumption, YAAZ plans to implement energy-efficient lighting systems and provide training to employees on electricity conservation.

Water Efficiency: YAAZ will conduct awareness programs for employees on efficient water management to optimize domestic water usage.

Afforestation Activities: To offset carbon dioxide emissions, YAAZ will engage in afforestation projects to expand carbon sinks.

Sustainable Transportation: YAAZ is developing a roadmap to encourage the use of electric and hybrid vehicles to reduce transport-related emissions. The company promotes the adoption of electric vehicles by reducing travel and transport needs and encourages the use of public transportation when necessary.

Renewable Energy Production: YAAZ generates its own electricity using renewable energy sources, primarily solar power. By harnessing energy from the sun, the company reduces reliance on fossil fuels, lowers carbon emissions, and strengthens its commitment to sustainable energy solutions.

YAAZ team

italy

angelettiruzza design

Silvana Angeletti and Daniele Ruzza are Italian industrial designers, internationally recognized for their ethical vision, which is understandable and close to people. Founders of their own studio in 1994, they design essential, functional objects capable of withstanding the passage of time. Their work, characterized by a solid and long-lasting career, challenges the logic of mass production while maintaining a distinctive style that can be recognized in every creation. Some of their products are part of the permanent collection of the Chicago Athenaeum Museum, and many others have been awarded the most prestigious international design honors.

italy

raffaella mangiarotti

Raffaella Mangiarotti is an architect and designer. She lives and works in Milan. She holds a degree in architecture, a doctorate in design, and is a researcher at the Politecnico di Milano. After working with Marco Zanuso and Francesco Trabucco, she founded deepdesign with Matteo Bazzicalupo, designing innovative products for major companies in the sector, including Smeg, Whirlpool, and DaimlerChrysler. In 2010, she founded the Raffaella Mangiarotti studio, where she specializes in art direction, furniture elements, showrooms, and exhibition design, designing internationally. Some of her products are exhibited in international museums and exhibitions and are part of permanent collections, recognized with international awards. From 2017 to 2024, she was appointed Ambassador of Italian Design in the world.

united states

michael graves design

Rob Van Varick and Donald Strum are industrial designers who have collaborated with Michael Graves for more than 40 years and now continue his legacy of designing functional, accessible, and beautiful products. Their firm, Michael Graves Design, is a 60-year-old company staffed with product designers, graphic designers, experiential designers, interior designers, and architects. Utilizing decades of experience, the firm collaborates with YAAZ to design products for the American market. This group, which focuses on creating products that fit the continent's lifestyles, possesses the leadership and knowledge to envision projects through multiple lenses.

türkiye

yaaz lab

YAAZ Lab is a workshop where creative processes are shaped freely, where design meets function and aesthetics. This space, which came to life with the collective vision of the YAAZ team, transforms the intimate relationship established with the material into unique collections by blending it with craftsmanship and innovation. Every detail is meticulously designed to enrich the user experience and add character to the spaces.

YAAZ Lab signature designs offer a contemporary perspective for those looking for a balanced harmony between form and function.

BARLA collection

angelettiruzza design

Aluminium and rope
meet to create the
iconic BARLA collection.

Generous aesthetics, combined with a wraparound design conceived for maximum well-being, make the BARLA collection the ideal choice for those who wish to experience their outdoor spaces with casual elegance, without sacrificing functionality or total comfort.

Solid and durable, our products are created to bring beauty and harmony to the world.

barla sofa

The BARLA collection seems to be suspended in the air, as if seeking direct contact with the sky, but at the same time it is deeply rooted in the earth. This duality, between lightness and solidity, between high and low, is its distinctive essence.

barla armchair

The BARLA collection offers endless style possibilities, thanks to the ability to play with the colors of the ropes and aluminum. In its monochromatic version, BARLA exudes sobriety and timeless elegance, with neutral tones that seamlessly blend into any environment. The purity of its lines and the simplicity of its forms are showcased in their full beauty, evoking a sense of calm and tranquility.

barla club chair

The BARLA club chair, with its cozy and comfortable shape, is the perfect addition to lounge areas in hotels and resorts. Inspired by the softness of a cocoon, its design creates an intimate and relaxing atmosphere, ideal for convivial spaces.

barla chair

BARLA reveals a mediterranean sunny soul energetic and lively when featuring bright, vibrant colors for the ropes and aluminum. Each space can be uniquely interpreted and personalized, thanks to the wide selection of colors.

barla table

The BARLA table is not just a surface for eating, playing, or working, but a platform for natural, fluid interaction and enjoyment. The harmonious shapes and the combination of different materials emphasize its versatility, making it a product that reflects the evolving uses and behaviors of contemporary society.

barla bar & counter stool

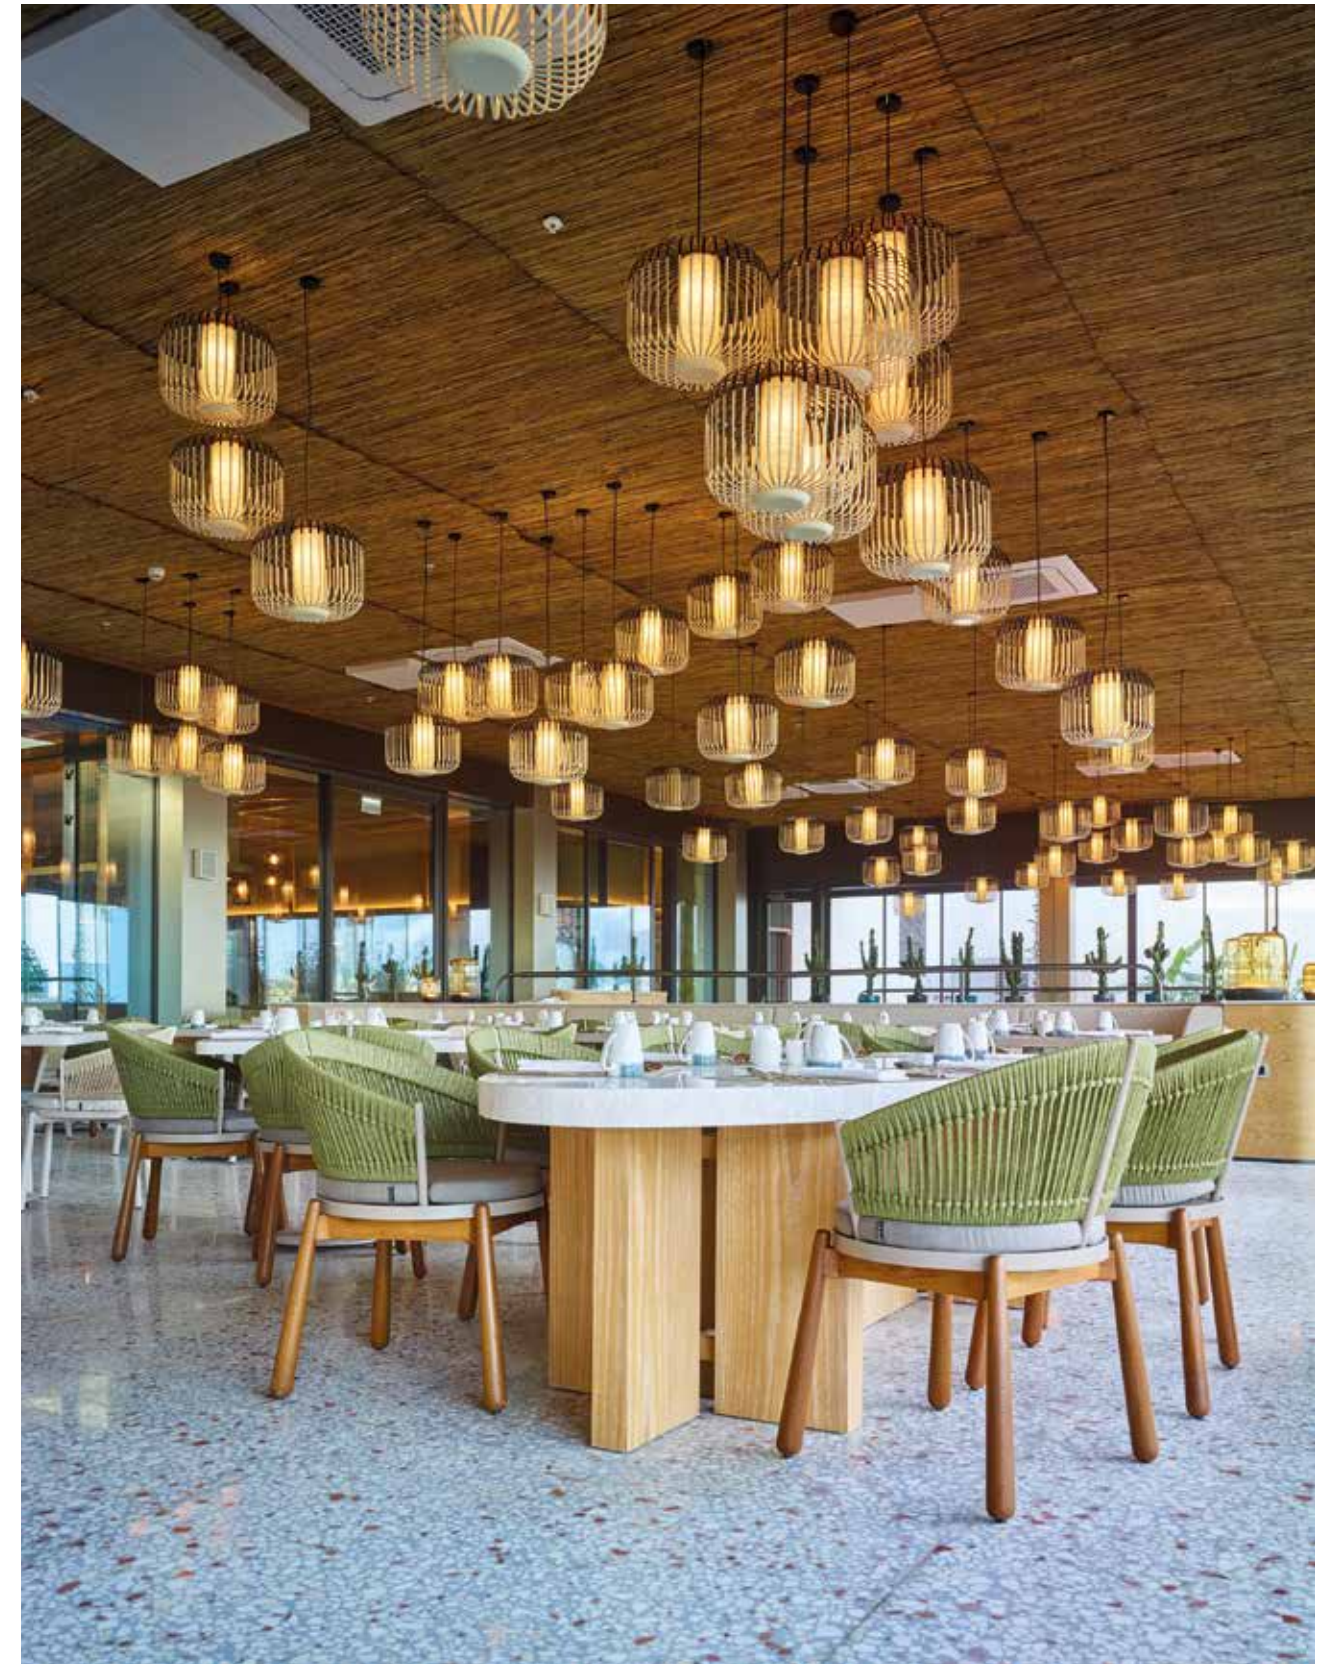

Made of high-quality stainless steel, the footrest offers excellent resistance to scratches and abrasions that could damage the aesthetics of the product with frequent use.

TURTLE collection

YAAZ lab

The TURTLE collection is inspired by the warmth of childhood memories, featuring a combination of teak wood, aluminum and rope.

turtle chair

The legs of the TURTLE chair are available in elegant teak wood or aluminum, allowing flexibility in choosing the material that best complements the style and ambiance of any space.

turtle S chair

In this version, the chair is crafted entirely from aluminum, ensuring durability even in extreme weather conditions.

turtle armchair

The TURTLE collection offers exceptional customization possibilities, featuring a wide range of material and color combinations that enable tailored designs to suit diverse tastes and settings. From the natural warmth of teak to the versatility of aluminum and the vibrant appeal of ropes, each element encourages creative expression.

turtle rocking chair

In its rocking version, the TURTLE armchair becomes a cozy nest of peace and intimacy. The gentle rocking motion, combined with its spacious seat, enhances the sense of relaxation and comfort.

turtle daybed

With its generous dimensions and gently rounded contours, the TURTLE daybed is designed to invite relaxation whether indulging in quiet solitude, enjoying a captivating read, or sharing conversation with company. The backrests are thoughtfully crafted, offering options in sleek aluminum or an elegant combination of aluminum and intricately woven rope, blending comfort with refined aesthetics.

turtle bar stool

turtle table series

Also ideal for contract use, the TURTLE table is available in three different sizes. Made entirely of aluminum, it is lightweight and durable. The legs are also removable, facilitating easier and more sustainable transport.

turtle bar table

turtle desk

turtle coffee table

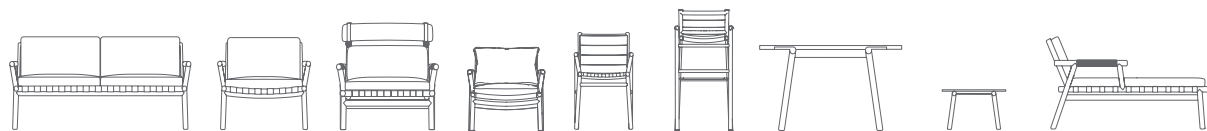

Sturdy yet lightweight, the TURTLE coffee table is ideal for furnishing any contract outdoor space. Available in two sizes, it is made entirely of aluminum, with an alternative version featuring aluminum legs and an HPL top.

UZ collection

angelettiruzza design

Natural elegance
and
contemporary design.

The UZ collection fits naturally into any environment. Well-balanced, aesthetically pleasing, and rich in character, UZ is a furniture collection that thrives both indoors and outdoors, thanks to the richness of the materials used and the timeless quality of its design. Inspired by the geometric form of a cylinder, which has been cleverly interpreted and adapted in height and diameter to meet the functional and structural needs of the collection, each piece emanates a dynamic and strong presence. At the same time, it maintains an elegant, modern aesthetic that can easily integrate into any context.

uz armchair

Boasting a strong visual impact, the UZ collection is a furniture line that embodies a classic soul, evoking the exotic and enchanting atmospheres of past travels to distant worlds.

uz sofa

Seats and backs are complemented by soft, removable cushions that enhance the overall feeling of comfort and relaxation, reflecting the company's philosophy of outdoor living.

uz lounge

The UZ lounge is made from fine teak wood sourced from Myanmar, where the optimal ecological conditions support the cultivation of these exotic and valuable trees. Known for its dimensional stability, hardness, and water resistance, it is highly durable and can withstand temperature variations, humidity, salt, and weathering.

uz club chair

The UZ club chair is extremely comfortable and compact, integrating seamlessly into any space while maintaining the high standards of quality that characterize YAAZ's production.

uz chair

The clean lines of the UZ collection define a timeless, balanced, and simple form while adding a touch of personality to any environment.

uz foldable table

Simple yet ingenious, the UZ table exemplifies thoughtful design. Its teak legs can be easily folded down via a clever rotational mechanism, allowing the support structure to nest neatly within the table. Available in various sizes and shapes, it offers versatility for different spaces while ensuring effortless transportation, space efficiency during shipping, and convenient storage during the off-season.

uz desk

uz bar & counter stool

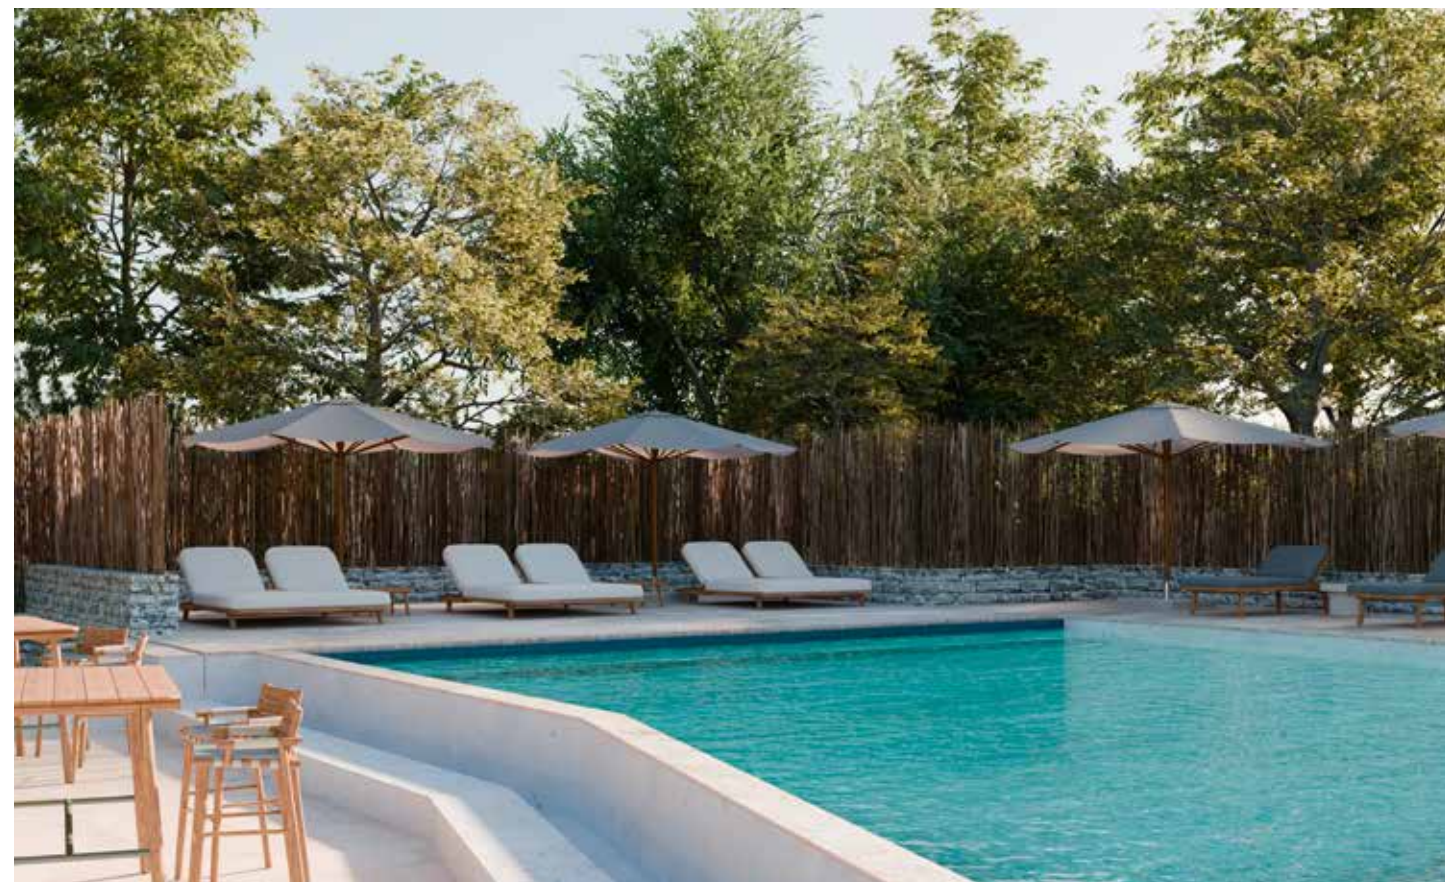

uz sunbed

With the UZ sun lounger, every moment of relaxation in the open air is enhanced by functional and refined design, combining the sensory and material qualities of teak with an intelligent space-organizing solution for total comfort. The sun lounger features an adjustable backrest that, when raised, reveals a storage rim for towels, clothes, and personal items.

uz double sunbed

Offering irresistible comfort, the UZ double sunbed accommodates two people and ensures maximum well-being.

The adjustable backrest, when raised, creates a space with a storage rim for towels, clothes, and personal items.

uz daybed

The clean, softly contoured shapes are complemented by a removable cushion with internal padding made of Foam Dry. The purity of a timeless, elegant, and refined design is balanced with the practicality and durability required of an outdoor furnishing accessory.

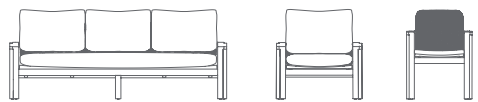

Teak wood is particularly well suited for outdoor use due to its durability, robustness, and strength. The natural teak blocks we import from Myanmar are processed in our factory through all stages until they become finished products.

DENK collection

angelettiruzza design

Design that
evokes
quietness.

Made from precious teak wood, the DENK seating line features generous volumes and large dimensions, including a chair, armchair, and sofa.

denk sofa

The structure is made of original teak wood, while YAAZ synthetic rope cables are used for outdoor applications. YAAZ rope, a material produced by the company, offers excellent protection against the sun and atmospheric elements.

denk armchair

The DENK collection combines elegance and comfort, creating a luxurious outdoor living space. The fine teak wood from Myanmar, paired with the warm tones of the woven ropes and high-quality Sunbrella fabrics, makes this collection ideal for any architectural project or residential setting.

The line includes chairs, armchairs, and sofas in two sizes, all designed to offer ample seating space, perfect for outdoor relaxation. The DENK collection features precise design with timeless allure, where wood, rope, and fabric seamlessly combine style and functionality. It represents the perfect blend of classic teak garden furniture and contemporary form.

denk chair

The line includes chairs, armchairs, and sofas in two sizes, all designed to offer ample seating space, perfect for outdoor relaxation. The DENK collection features precise design with timeless allure, where wood, rope, and fabric seamlessly combine style and functionality. It represents the perfect blend of classic teak garden furniture and contemporary form.

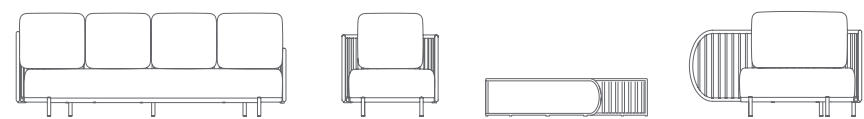

The DENK chair strikes the perfect balance between solidity and comfort, designed to offer a pleasant seating experience for long hours spent around the dinner table with friends, ensuring complete relaxation.

OVA collection

YAAZ lab + angelettiruzza design

A lively
and modular
rhythm.

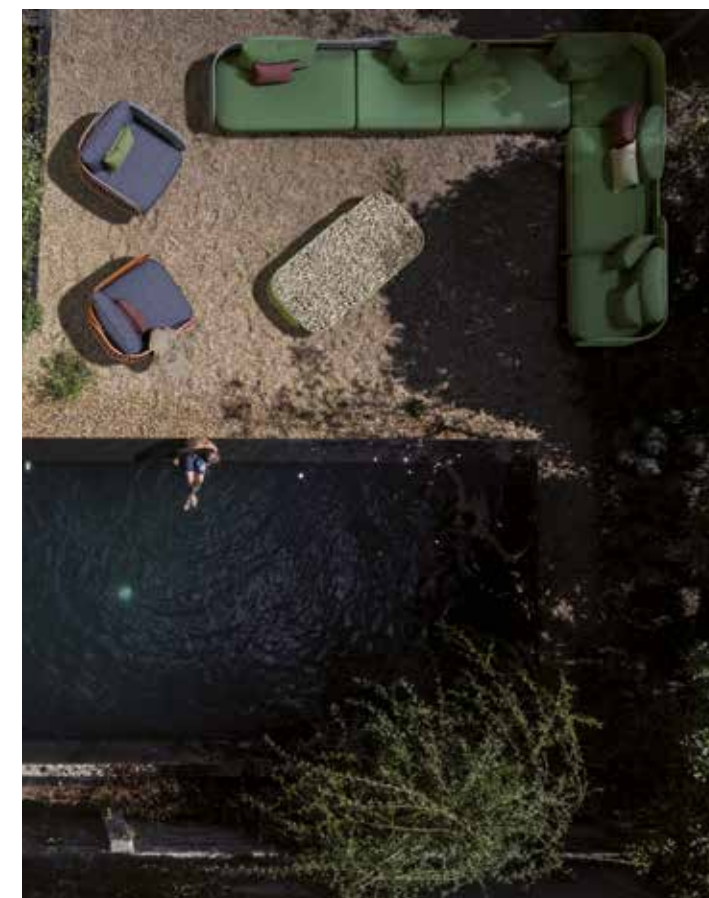

OVA is a modular seating system with a lively, dynamic character, designed for maximum customization as well as flexibility. Its aluminum frame is lightweight yet weather-resistant. The backrest design features an interplay of different shapes and heights, which can be adjusted to fit the chosen configuration, offering a variety of aesthetic and functional solutions. Comfort is a standout feature of OVA: the deep seat, combined with the option to add cushions freely placed on the backrest, ensures each seat is exceptionally comfortable and cozy. This system provides not only a wide range of combinations and configurations but also a relaxation experience that is tailored to meet every need, whether in residential or contract settings.

The presence of ropes, available in a wide range of colors and textures, adds a unique aesthetic and material dimension to the collection, enhancing its versatility and contemporary appeal. OVA's geometries are both simple and original, with clean lines that strike a perfect balance between functionality and innovative design.

ova modular

YAAZ aims to provide its customers with the opportunity to express their individuality through color choices and tailored materials. OVA embodies this philosophy by offering a high degree of versatility. From the rich material weave created by the ropes to the exclusive YAAZ-designed mesh, and the sleek purity of aluminum, OVA accommodates a range of styles. The available elements can be combined to form eclectic and original arrangements, or more cohesive choices can be made, depending on personal aesthetic preferences and functional requirements.

- You can find more detailed information about the variations of OVA modular parts on the [Technical Info](#) page.

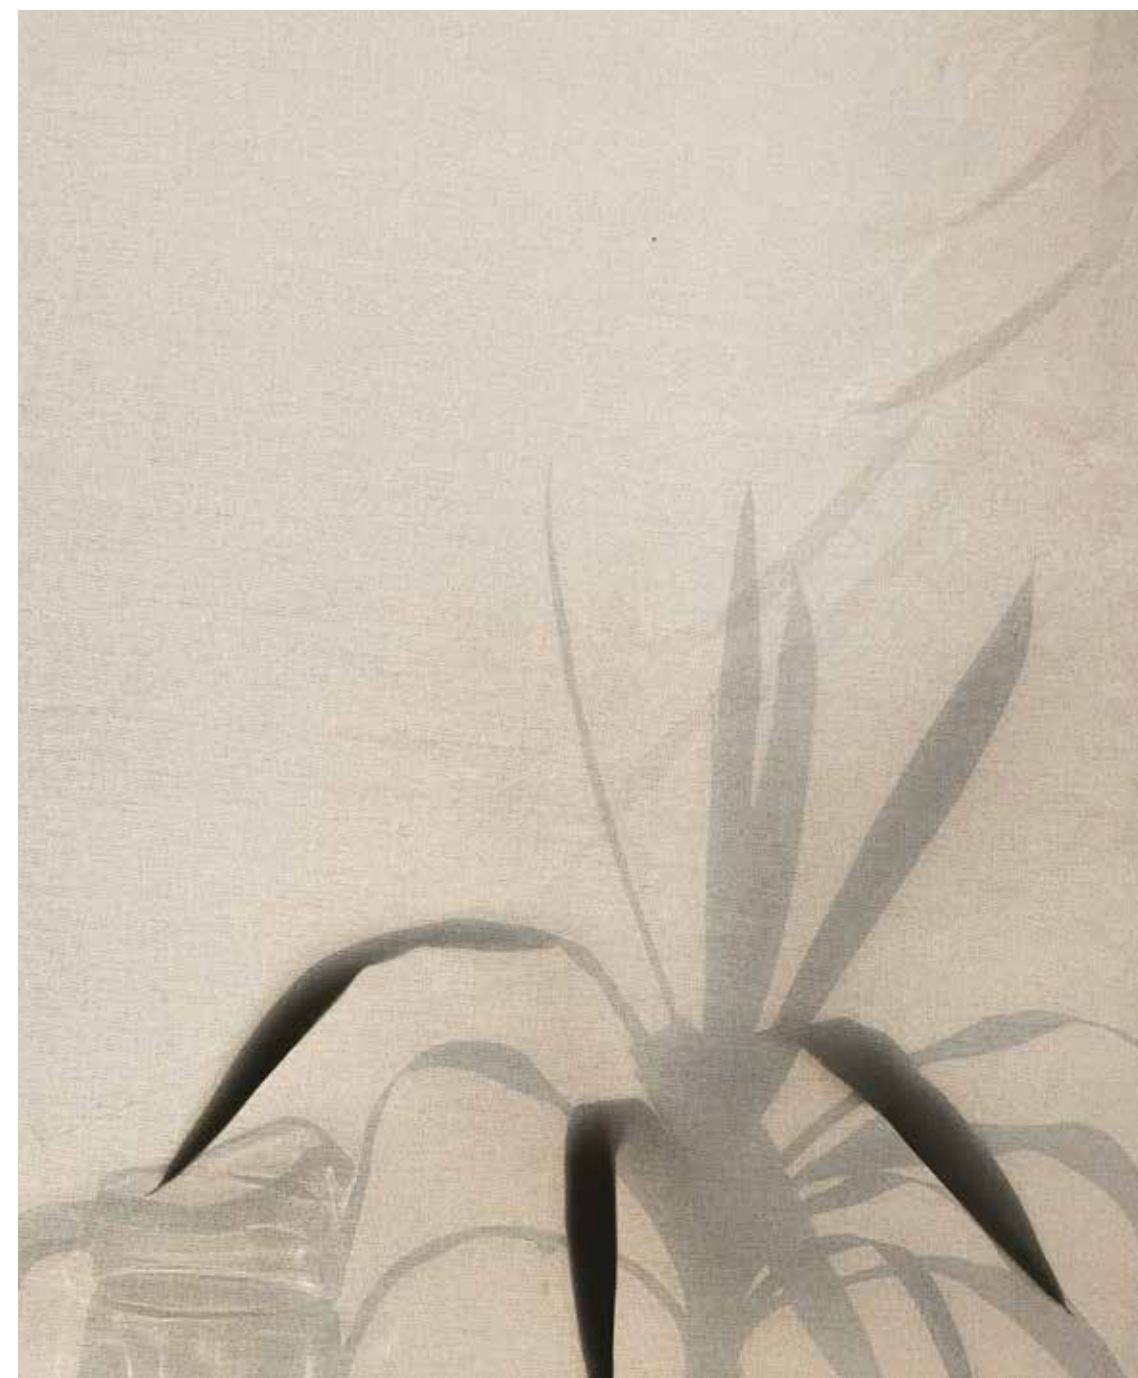

ova armchair

The backrest of the OVA armchair is designed to be round and enveloping, resembling two arms coming together in a warm and welcoming embrace. This soft, curved shape not only gives the armchair an elegant and distinctive appearance but also creates a sense of deep comfort, gently enveloping those who sit in it.

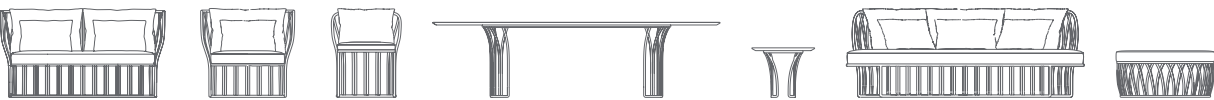

KORU collection

raffaella mangiarotti

Classic elegance
meets
contemporary
comfort.

The collection is inspired by vintage wrought-iron garden chairs, that trace elegant decorative patterns with slender metal rods. These light and ethereal shapes gain solidity through delicate intersections, giving life to a series of seats with enveloping and welcoming forms. The airy structures are made even more inviting by soft outdoor cushions, which add warmth and comfort to the metal's rigor. Each piece invites relaxation, transforming outdoor spaces into havens of well-being and conviviality.

ANKA collection

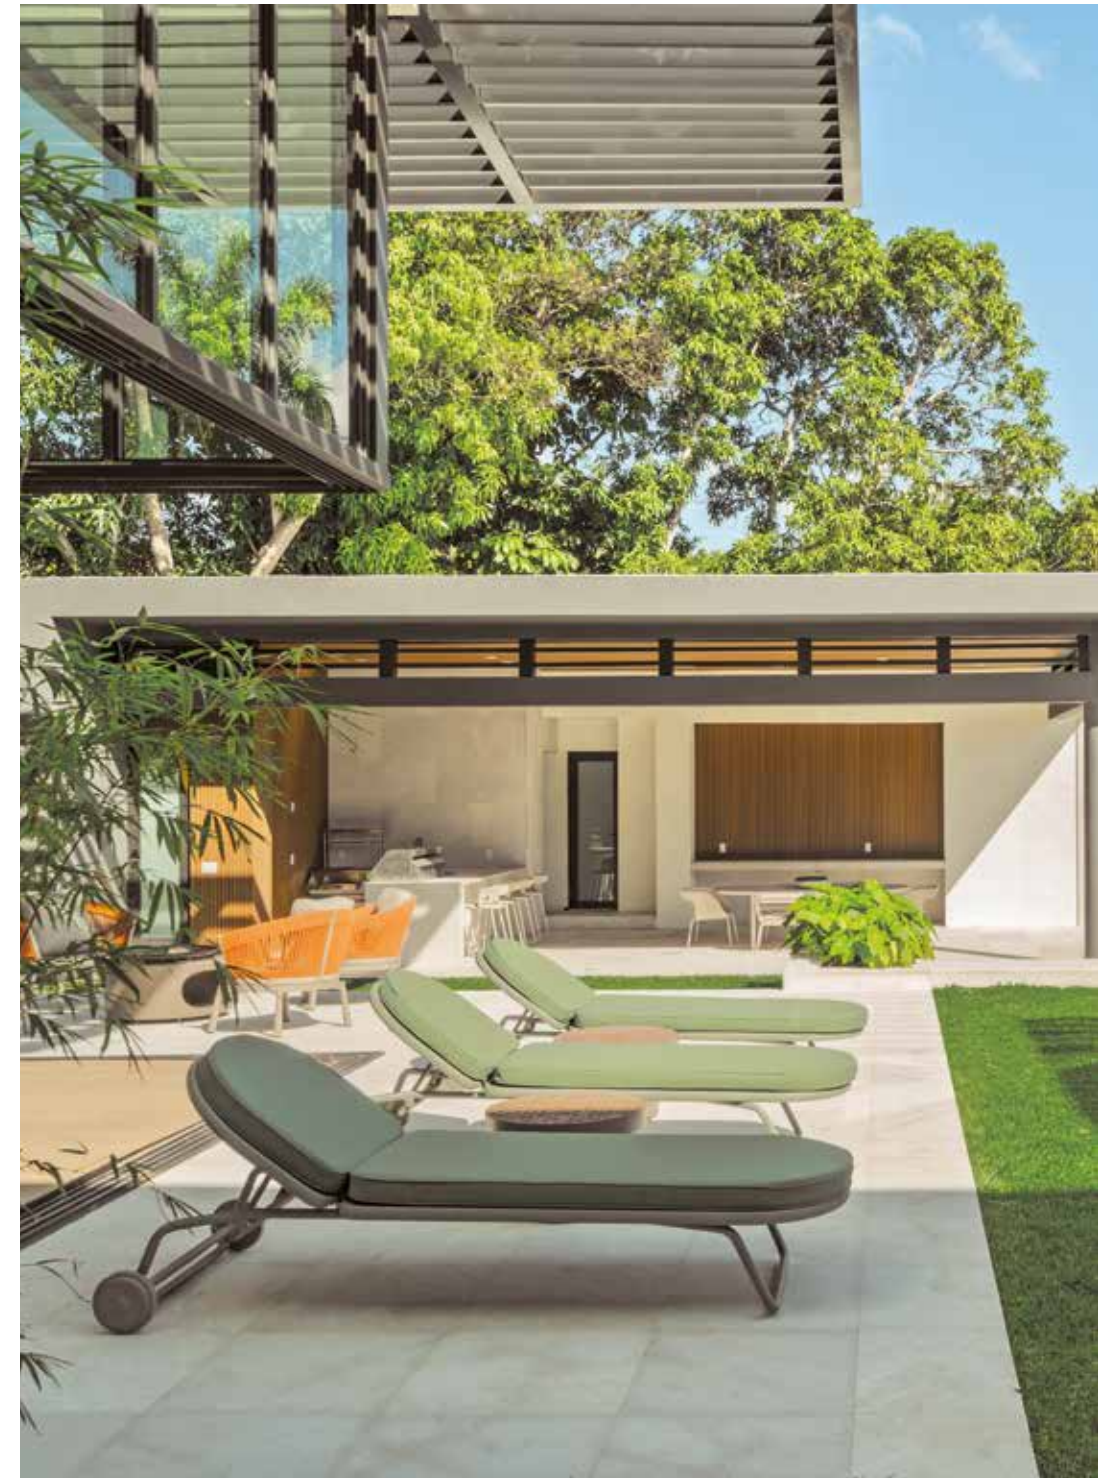

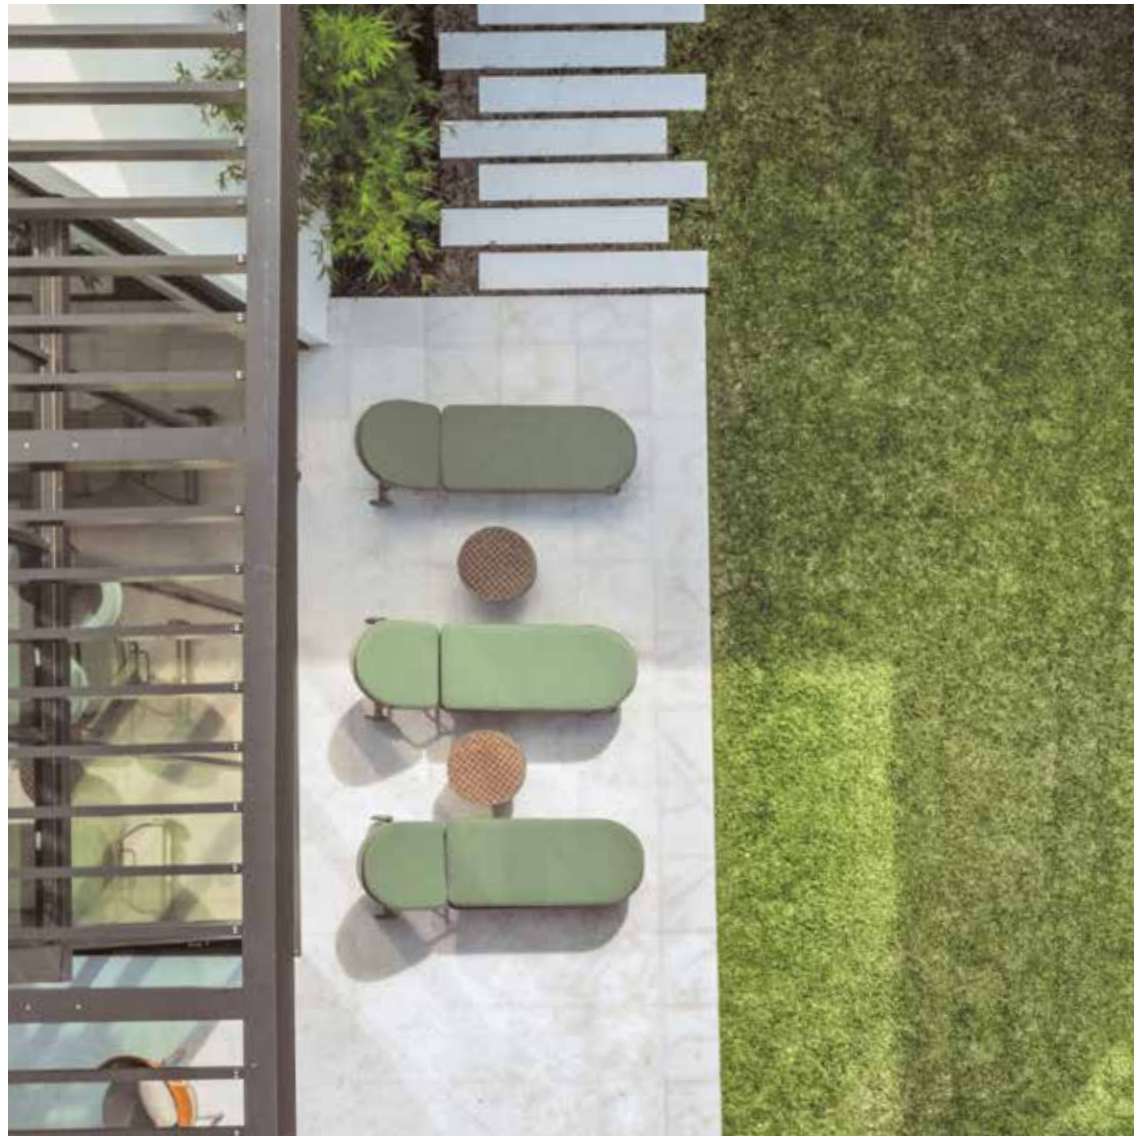

YAAZ Lab

Comfort in
contact with
nature.

anka sunbed

ANKA is a practical and functional crib designed for both ease of movement and durability. Featuring large rear wheels, ANKA can be effortlessly relocated, making it highly versatile for various spaces. Crafted from aluminum, known for its excellent strength-to-weight ratio and resistance to corrosion, ANKA ensures long-lasting performance in outdoor environments. The frame is coated with electrostatic polyester powder, which is very resistant to water, further enhancing its durability. Available in a wide range of colors, ANKA offers customization options to suit different styles and preferences.

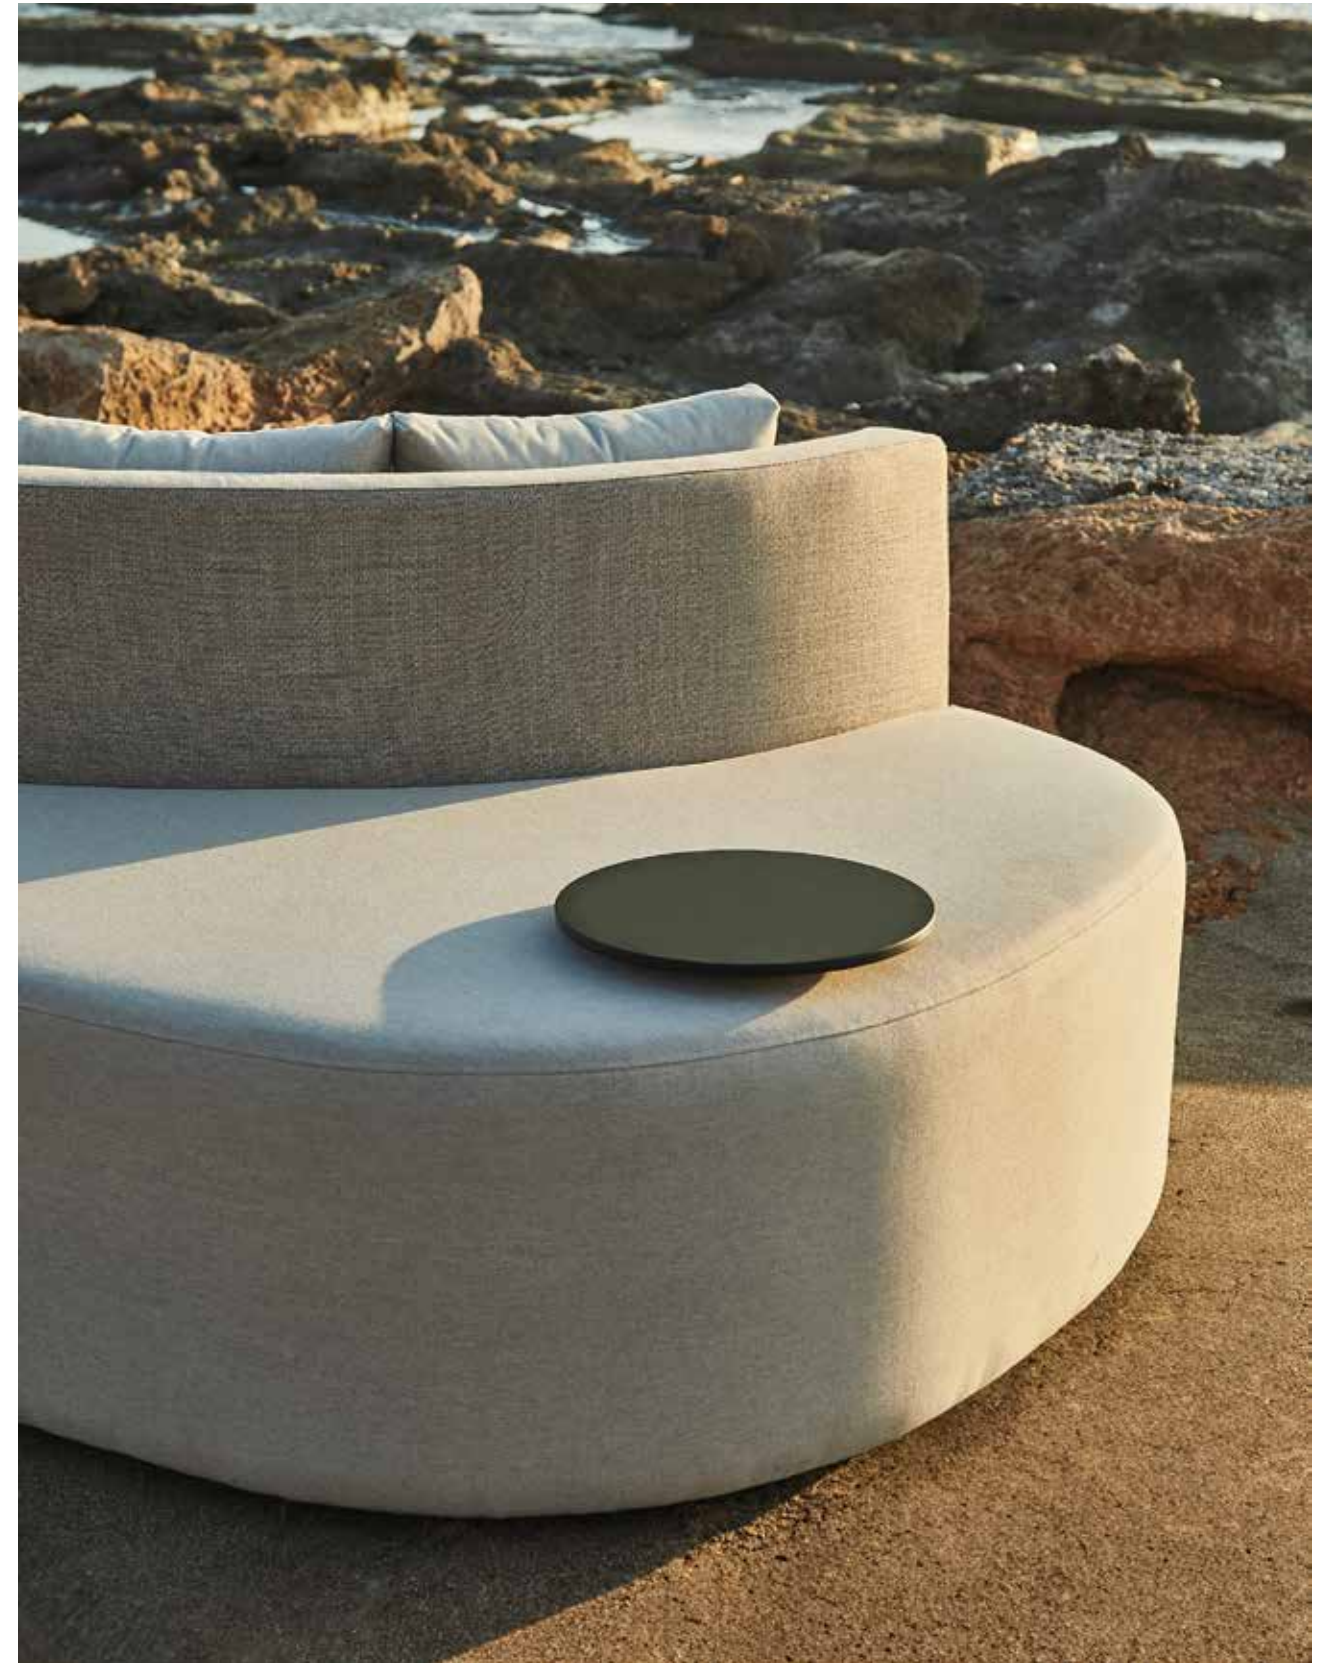

anka table series

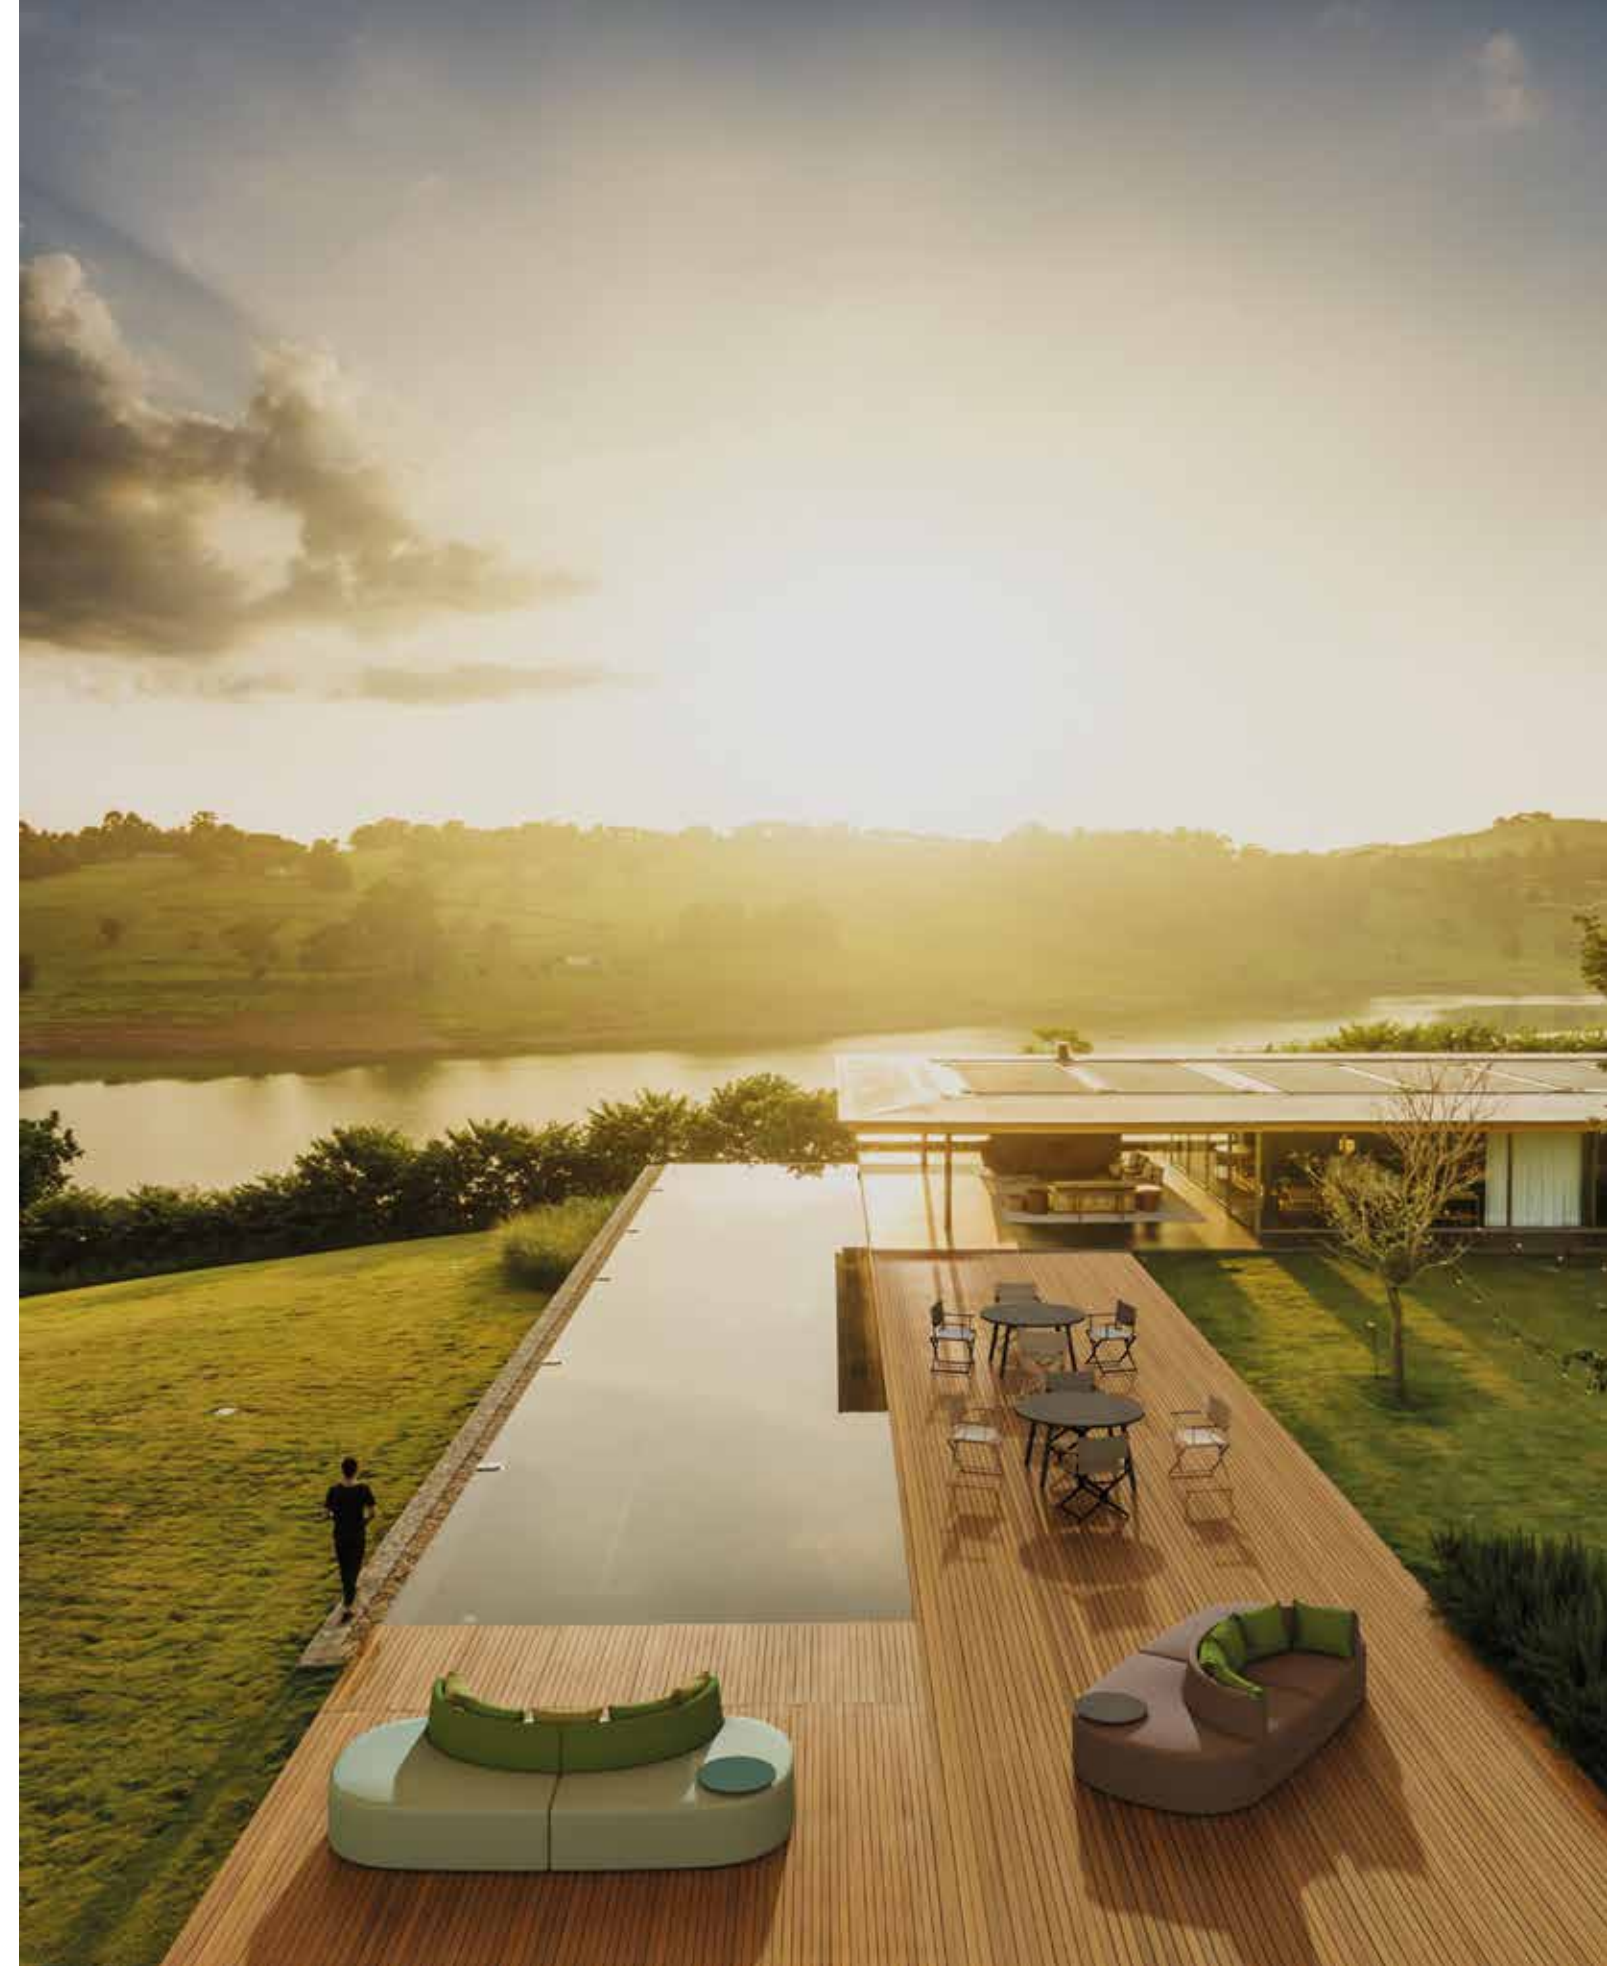

The three-piece table leg offers versatile customization with different color combinations to suit various design preferences. The part resting on the base is made from heavy-duty and weather-resistant stainless steel, ensuring durability and long-lasting performance. The tabletop can be selected from a range of materials, including aluminum, Z-Pact, and Ment, allowing for tailored aesthetic and functional choices. The base comes in two size options, ø42 cm and ø62 cm, providing flexibility for different table layouts and space requirements.

An oasis
of comfort that
redefines indoor
and outdoor life.

ADA is a sofa with generous shapes that can be used from all angles. Like an island in the open sea, it offers different perspectives and invites new, relaxed ways of use. It serves as an oasis, a flying carpet, or a platform to be experienced based on the feeling of the moment—whether you want to rest, play with your children, work, isolate yourself, or share. It consists of a softer section, a nest of plush cushions where you can feel pampered, and a firmer section where you can eat, meditate, work, or sunbathe. Its soft forms highlight the tactile and expressive qualities of the beautiful fabrics in the catalog, made according to the highest standards of resistance to outdoor elements. ADA is a unique and original piece that fits seamlessly with character into any type of architectural space, both outdoor and indoor.

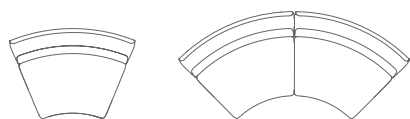

The feeling of suspension and freedom experienced in the middle of the sea, on a boat, or on a small island inspired designers Silvana Angeletti and Daniele Ruzza in the creation of ADA. The concept behind this project is to capture the sense of abandonment and serenity that arises when you let go, where only the warmth of the sun, the sound of the water, and the breeze caressing your skin seem to exist.

RASEL collection

angelettiruzza design

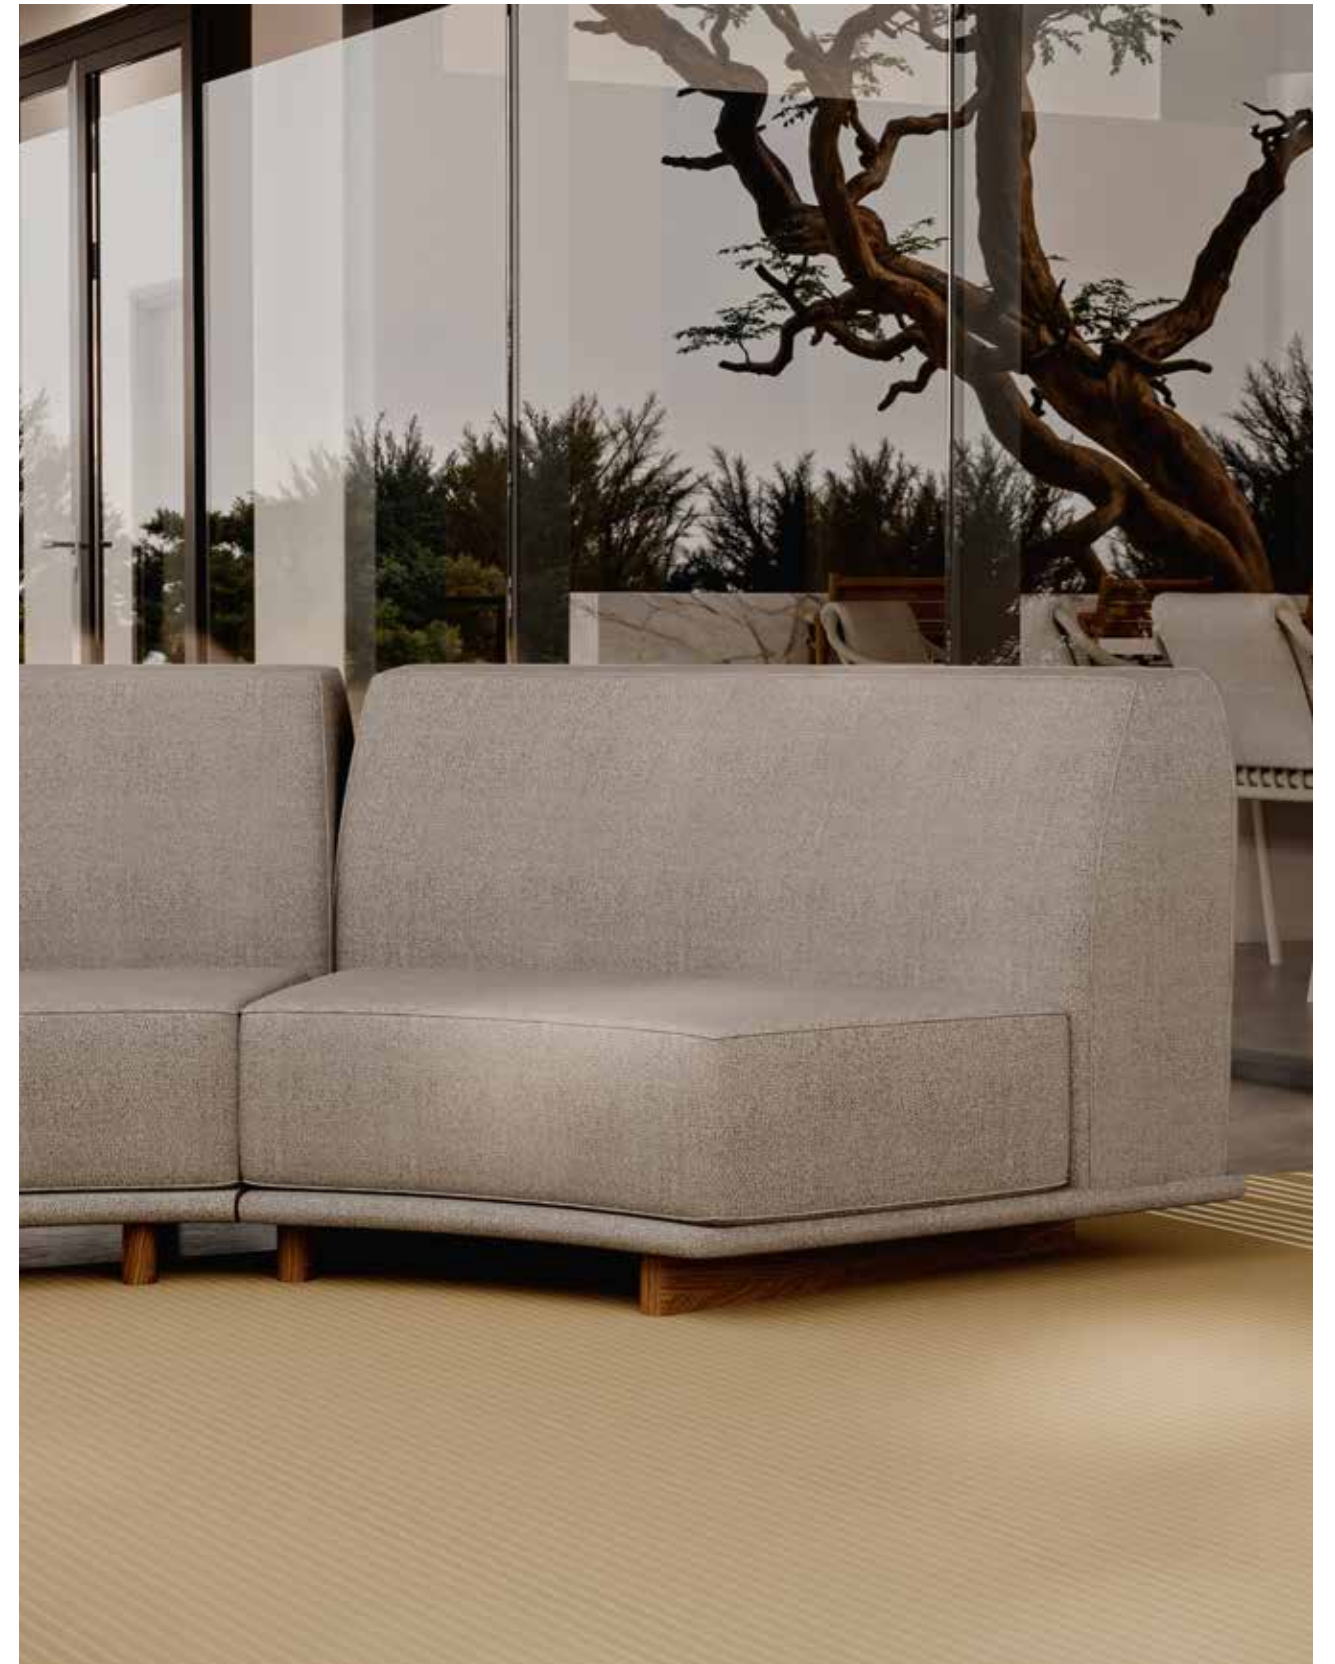

A modular sofa
designed to
encourage sharing
and foster strong
connections
between people.

rasel sofa

The sofa consists of two distinct upholstered modules, allowing for a variety of configurations and combinations. It is customizable to suit different comfort preferences and can be used indoors or outdoors, offering versatility for both environments.

DEDIM collection

michael graves design

Impactful design
with a
unique character.

dedim chair with table

The collection is a perfect balance of aesthetics, functionality, and well-being: made of die-cast aluminum and Serge Ferrari technical fabric, it redefines outdoor living with its strong and original identity. The accessories, reflecting the DNA of Michael Graves Design, further define the chair's unique character, seamlessly blending aesthetics and functionality into a practical and visually striking piece.

dedim chair

DEDIM is characterized by a combination of different shapes with a triangular section, resulting in a comfortable armrest that is perfectly connected. Due to its unique construction, it is available in both two-tone and monochrome options.

dedim chair with canopy

The DEDIM chair with canopy immediately invites you to relax, transporting you to a holiday atmosphere even in everyday settings. The canopy adds an element of comfort and protection, transforming the chair into the perfect refuge for enjoying quiet moments in the outdoors, whether in the sun or during a break in the backyard. The combination of essential design and functionality makes it ideal for outdoor spaces like terraces, gardens, or balconies, and for indoor settings designed to evoke a sense of vacation and freedom. The DEDIM chair with canopy is also an excellent choice for both outdoor and indoor contract spaces, thanks to its originality, sturdiness, and distinctive design.

MONTE collection

angelettiruzza design

Outdoor elegance
and comfort in three
distinctive versions.

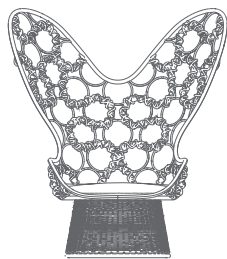

monte chair

The MONTE chair is stackable and offers three distinct backrest options. The simplest model is crafted entirely from aluminum, while the more luxurious version features soft cushions that wrap around the backrest, enhancing the outdoor atmosphere for leisurely, relaxed moments. The third version showcases a special rope weave, available in a variety of color options. The sophisticated metal armrest casting technique further emphasizes the brand's commitment to detail and its significant investment in research and development.

OPUS

angelettiruzza design

A butterfly beating
its wings,
a heart embracing,
an organic weave
of strings dancing.

opus bergère

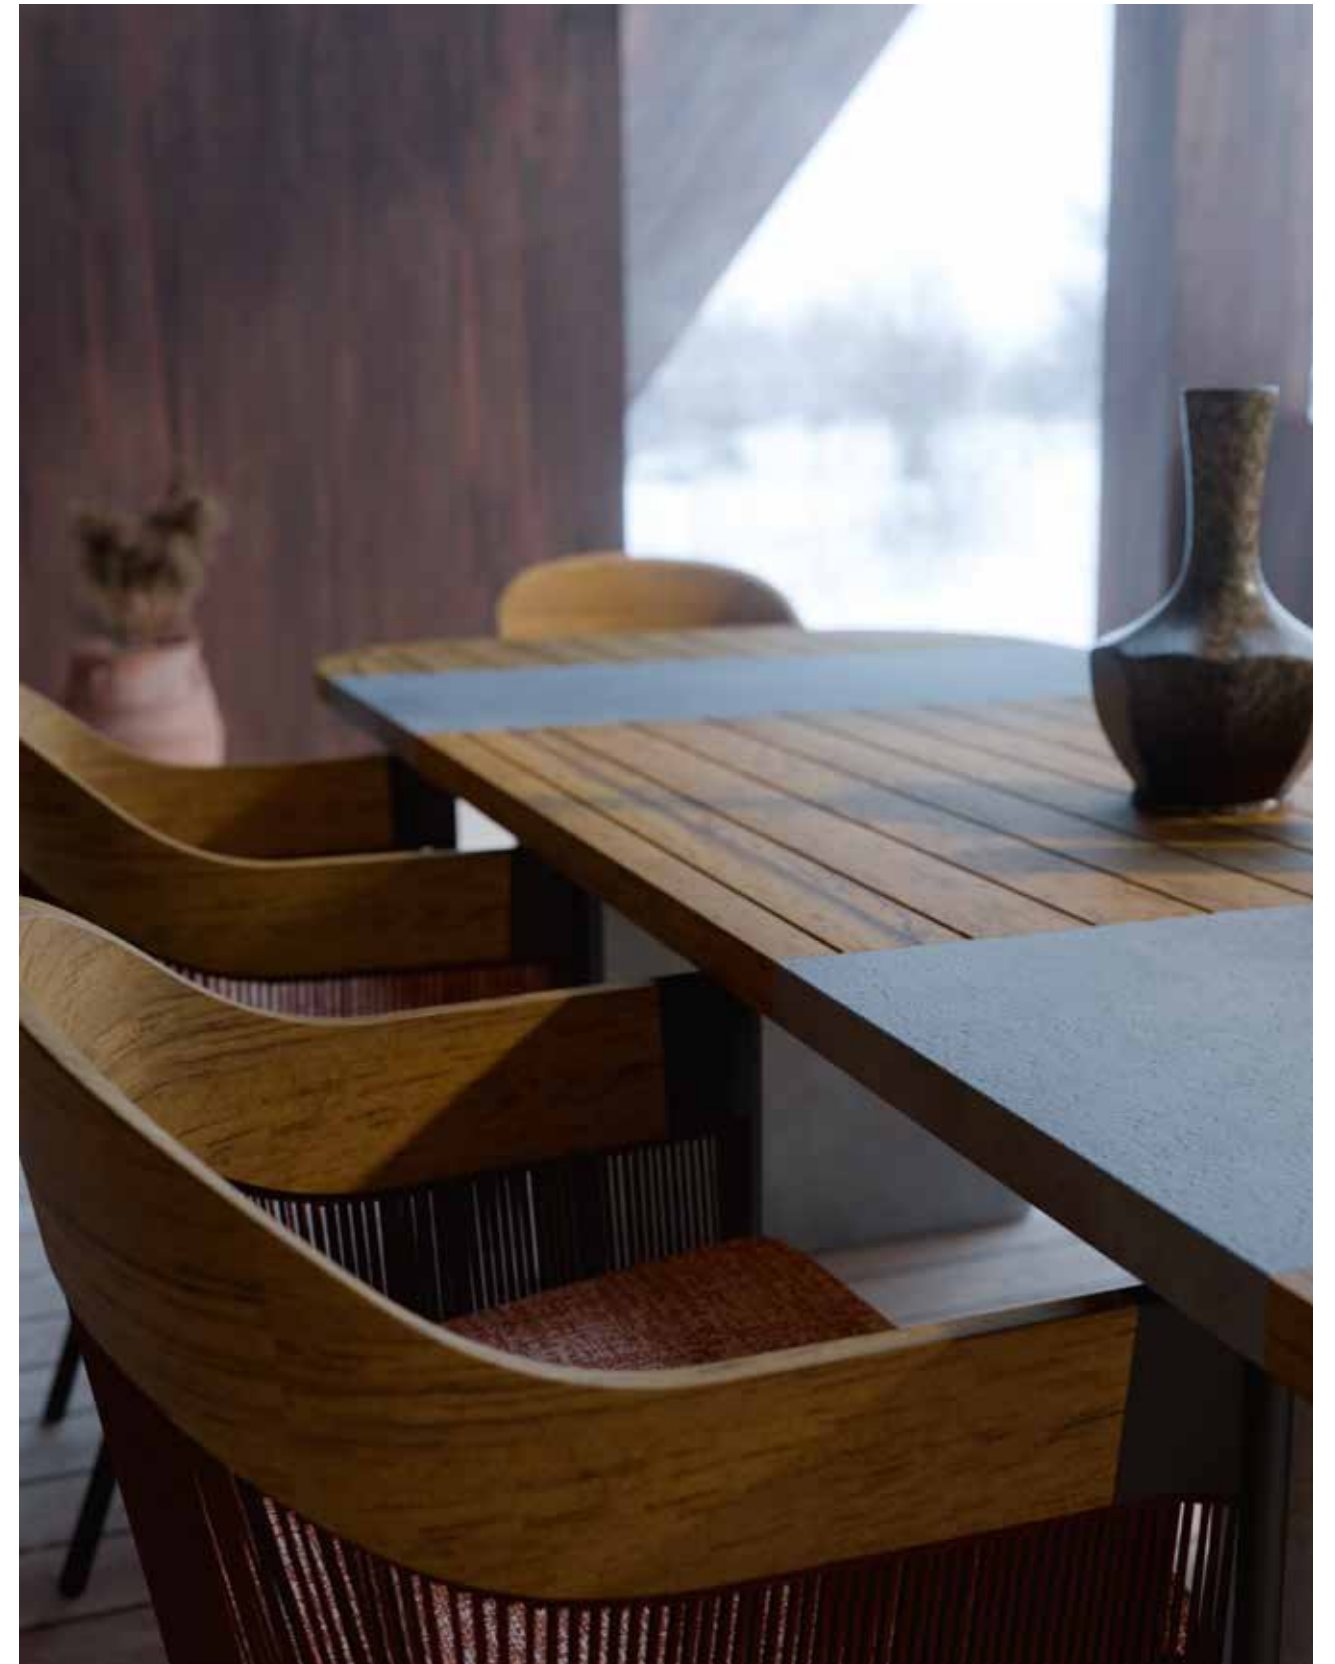

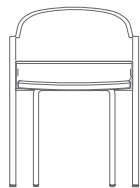

With its enveloping and feminine shapes, OPUS is an outdoor armchair distinguished by its wide backrest, offering a light and graceful presence that blends perfectly into the natural context from which it draws its inspiration. OPUS is an iconic element, capable of harmonizing with its surroundings, expressing elegance and naturalness in every detail. Its generous dimensions create a pleasant contrast with the light surface of the backrest, adorned with the fluid and sensual pattern of the weave.

KENDA collection

michael graves design

Wood, aluminum and
rope: a combination
of tradition and
modernity.

kenda chair

The KENDA chair highlights enveloping shapes and is characterized by the combined use of wood, rope, and aluminum. This chair evokes refined handicraft techniques that evolve into a modern, practical, and functional object. The KENDA chair represents a perfect fusion of tradition and modernity, as well as technology and craftsmanship.

EDI collection

angelettiruzza design

Comfortable and
lightweight,
perfect for both
indoor and
outdoor use.

edi chair

The EDI stackable chair is designed for practicality, easily stacking to maximize space when not in use. It can be crafted entirely from aluminum for a modern, minimalist look, or feature an original teak backrest that adds a warm, natural touch. This versatility makes the chair perfect for those seeking a balance between contemporary and traditional materials. Lightweight, comfortable, and weather-resistant, the EDI chair is a versatile piece that can furnish any indoor or outdoor space and is available in a wide range of colors.

edi bar & counter stool

Simplicity as an expression of quality: the EDI stool features a pure form, complemented by thoughtful details such as the stainless steel footrest cover. Available in two versions, the stool can be made entirely of aluminum or with a backrest in original teak. Two height options are available: counter and bar stools (H: 85 cm and H: 95 cm).

Lightness, stability,
and exceptional
functional
performance define
SAYE a timeless
product that stands
the test of time.

saye chair

SAYE is a contemporary reinterpretation of the classic folding director's chair. Comfortable, solid, and functional, its die-cast aluminum frame ensures exceptional outdoor performance, featuring lightweight construction, resistance to the elements, and remarkable sturdiness. The teak inserts on the armrests add comfort for extended use, while the fabric of the seat and backrest is fully removable for easy cleaning and replacement. YAAZ offers its original take on this iconic, space-saving product.

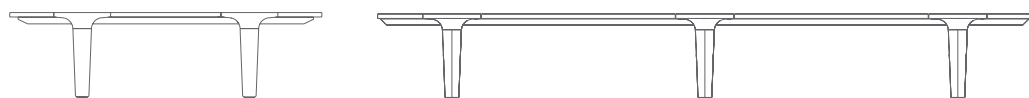

saye stool

The functionality of saving space is brilliantly addressed by the foldable design of the SAYE stool, making it easily transportable and storable. The die-cast aluminum structure features a cleverly designed opening and closing joint for the seat, ensuring remarkable lightness. Thanks to its lightweight and stable characteristics, SAYE is an ideal choice for furnishing any type of yacht.

SEMT collection

angelettiruzza design

Innovation,
functionality,
and beauty come
together to
enhance the
experience of
conviviality.

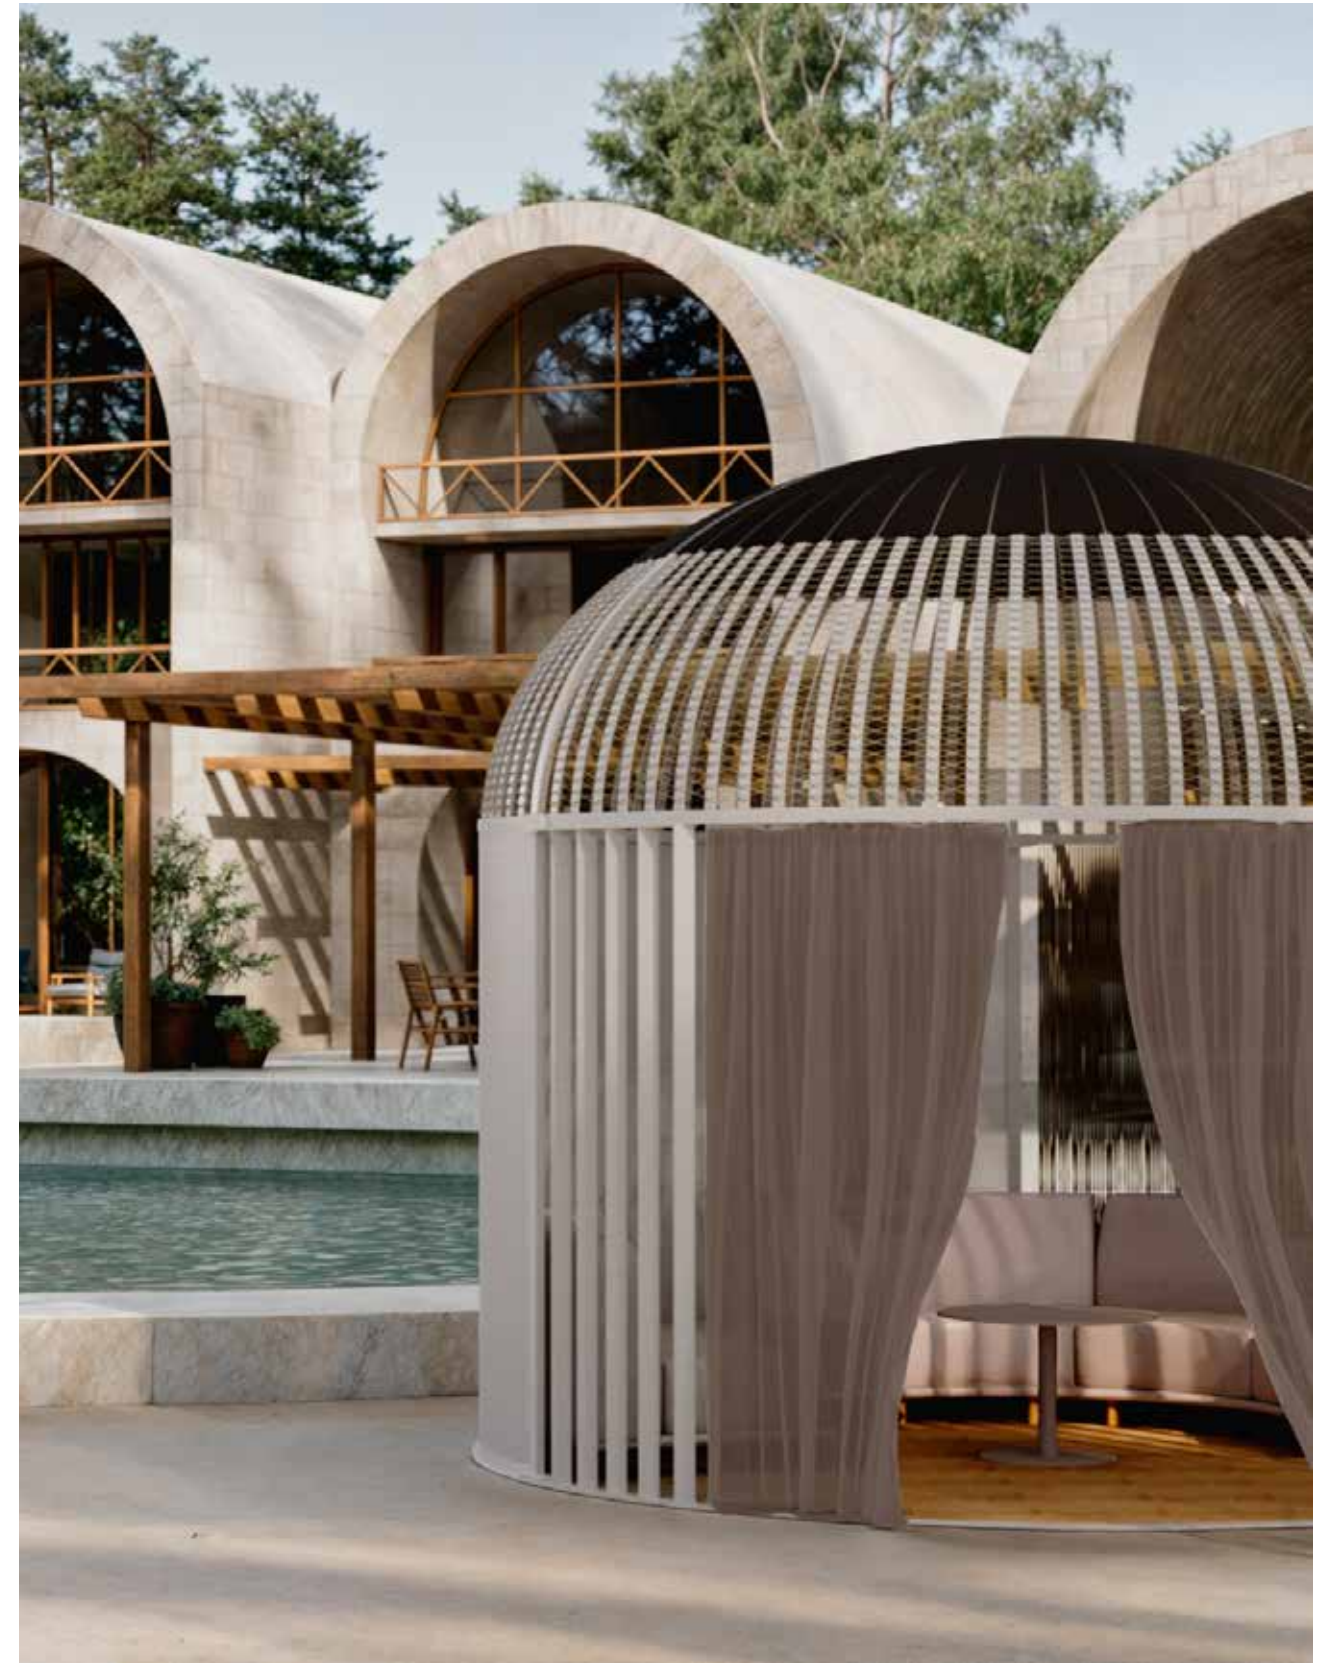

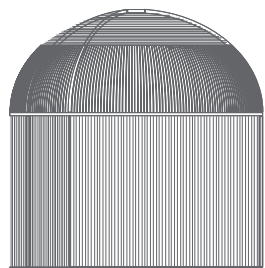

semt table

A modular design for an intelligent table, created to meet the needs of a world seeking sustainable and innovative solutions.

The table's supporting structure is composed of a single die-cast aluminum module, providing stability, lightness, and a seamless, elegant form. By adding additional modules and extending the teak tops, the table can reach larger dimensions while ensuring easier storage, transport, and recycling.

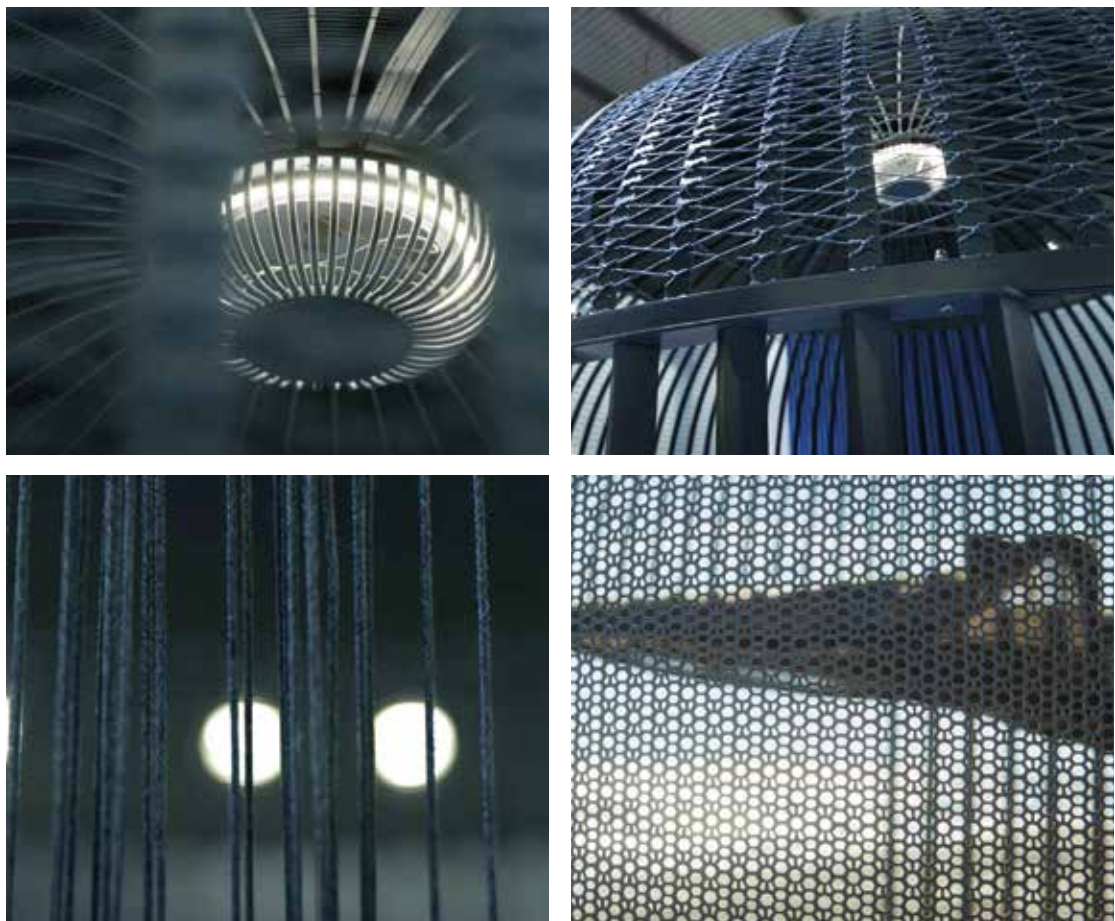

The heart of
every
outdoor space.

The FESS gazebo has a diameter and height of 3.5 meters. Its spacious and inviting interior features either a rope or teak floor and is fully customizable to suit the customer's preferences, allowing for the creation of a tailored environment for any need. The space can be furnished with tables and chairs, making it ideal for an intimate and exclusive outdoor dining area; armchairs and sofas to transform the gazebo into a cozy retreat for relaxation and socializing; or sun loungers to provide a shaded resting spot, making it a perfect wellness area as well.

fess gazebo

Inspired by the graceful form of the weeping willow, FESS reinterprets the traditional berceau—a richly decorated garden gazebo—offering a contemporary vision that retains the warmth and beauty of these historic spaces while embracing a modern, minimalist aesthetic. A distinctive feature of FESS is its dome, covered with woven ropes that cascade downward to create soothing shade, adding a unique textural and decorative effect. These ropes enhance the natural, inviting atmosphere, transforming the gazebo into an ideal retreat during the hottest hours of the day or a secluded corner for an intimate outdoor dinner. The structure is made of aluminum, fully disassemblable, and equipped with a central fixture for lighting.

complements

HAYAL

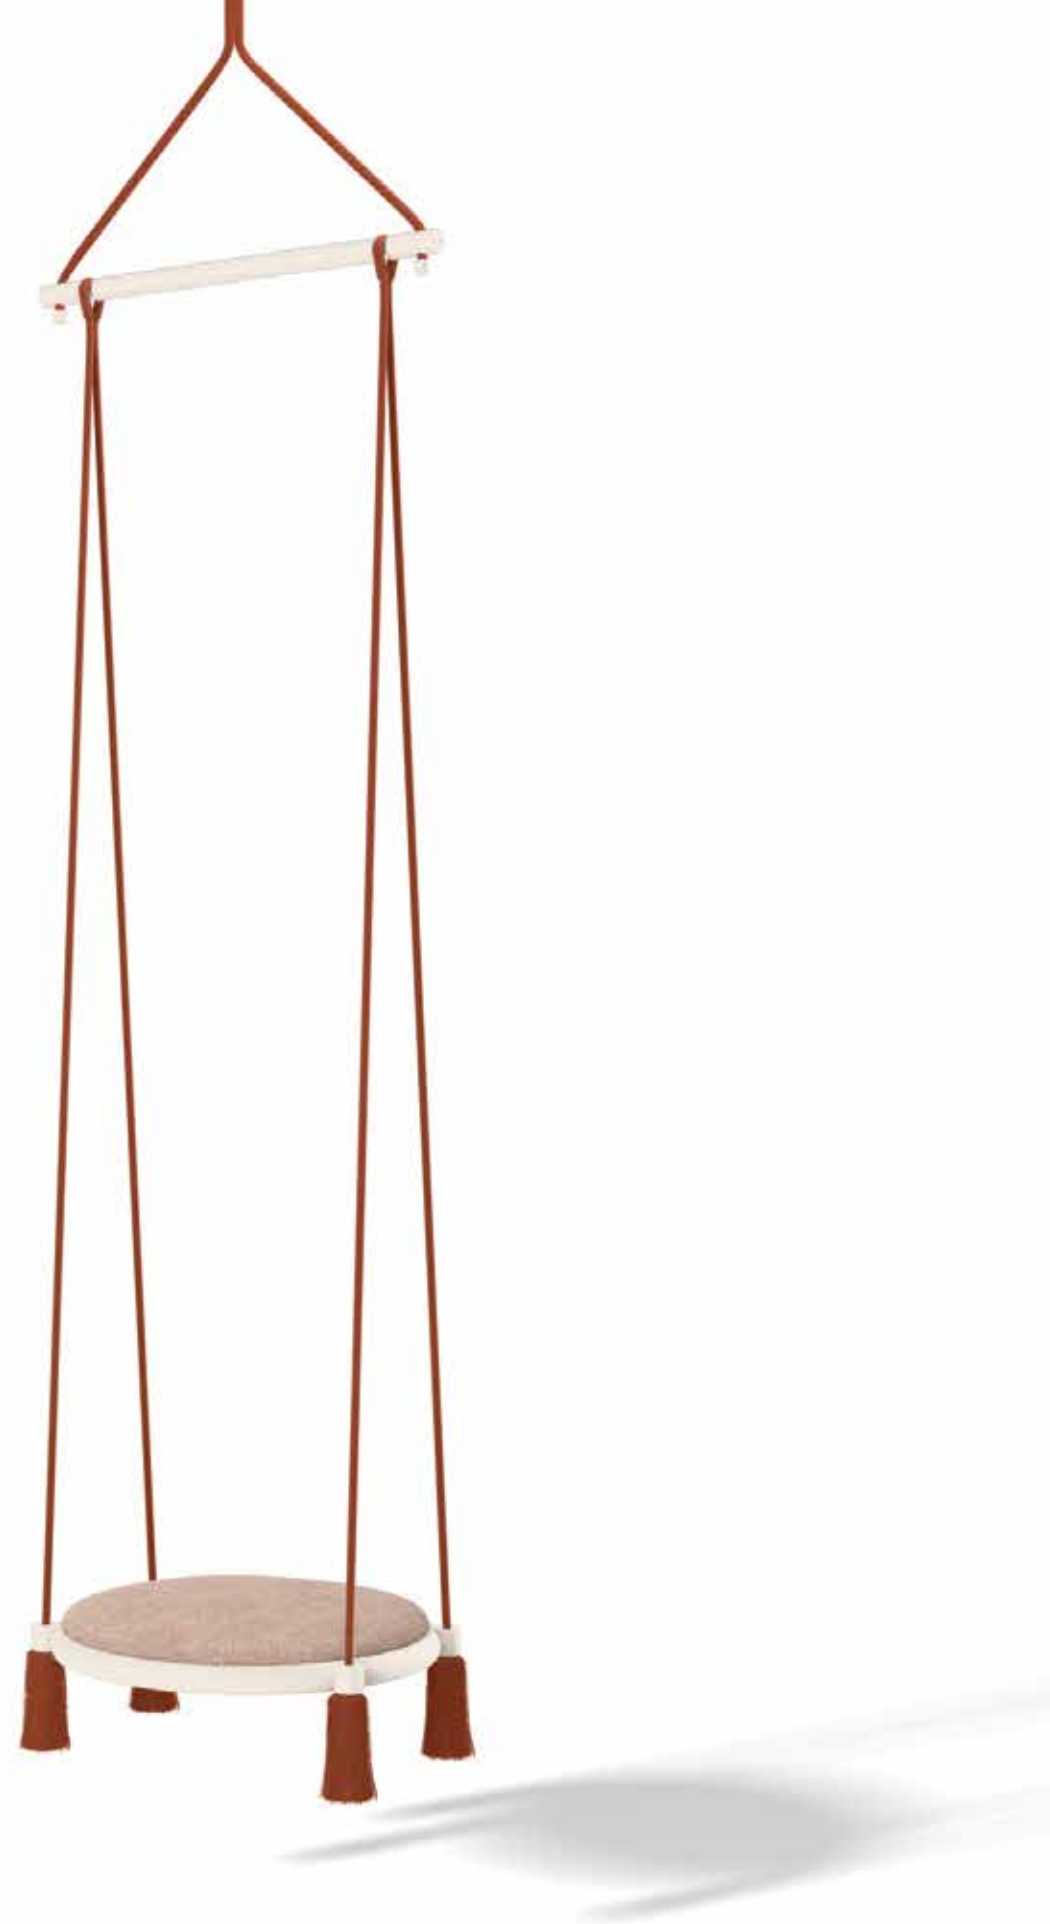

angelettiruzza design

The encounter
between
Turkish tradition
and
Italian culture.

This poetic piece of furniture, reminiscent of childhood memories, was conceived as a place and a non-place—an enchanting object, much like a flying carpet, that invites one to drift into a dreamlike realm. A harmonious fusion of Turkish craftsmanship and Italian design, the HAYAL circular swings possess a strong visual presence while maintaining a minimalist form. The frame is crafted from aluminum, while the seat features a plush cushion, adorned with delicate tassels that enhance the charm of its suspended structure.

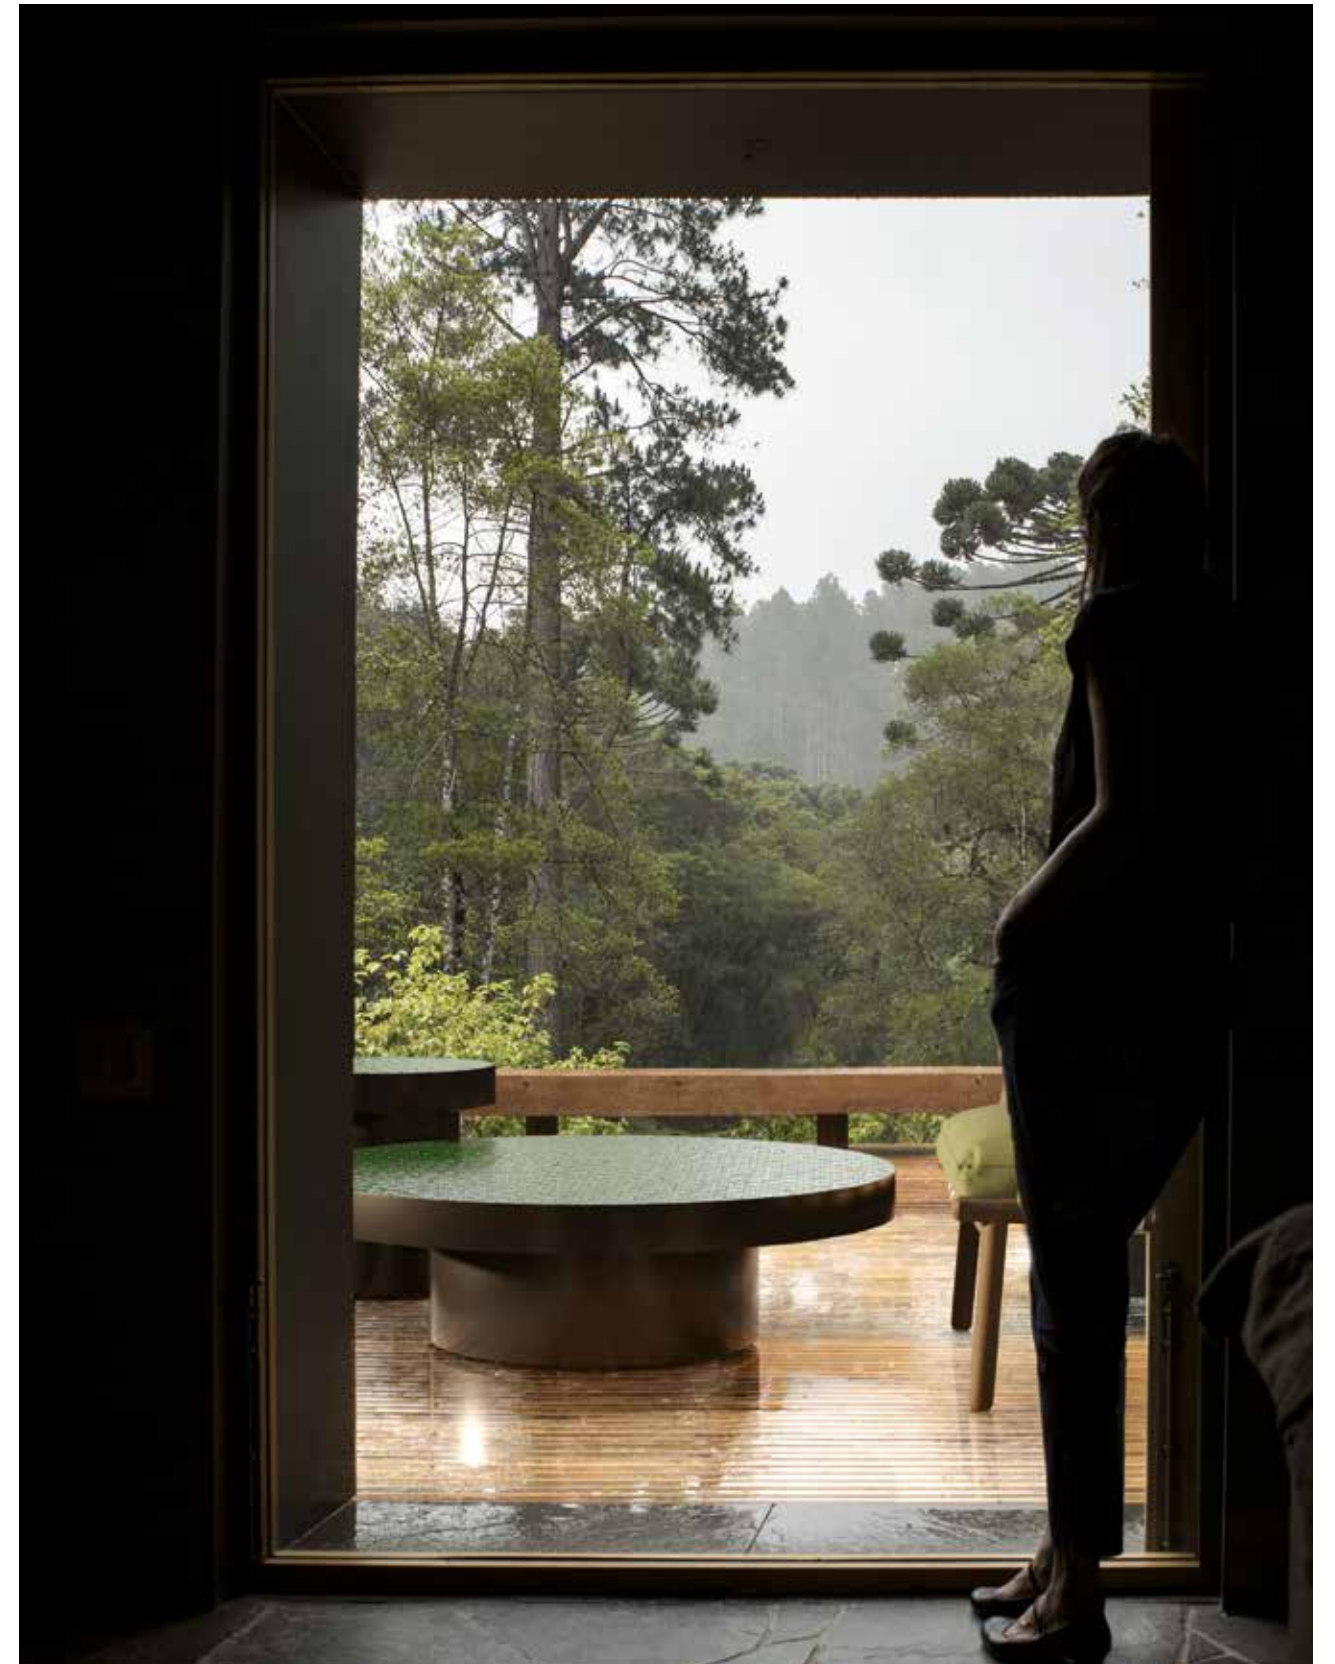

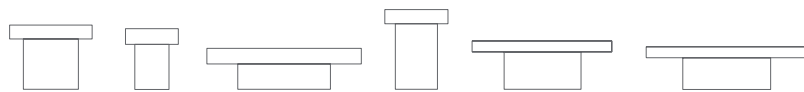

hayal swing

HAYAL is constructed from aluminum and synthetic rope specifically designed for outdoor use. This yarn, produced by the company, provides excellent protection against sunlight and weather, ensuring strength and durability over time. Complementing the design, Sunbrella fabrics made from acrylic outdoor fibers offer outstanding resistance to weather, UV rays, and mildew, maintaining vibrant colors and the material's integrity even in harsh conditions.

A vital contrast
that creates
harmony.

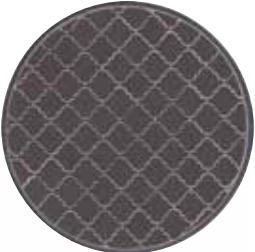

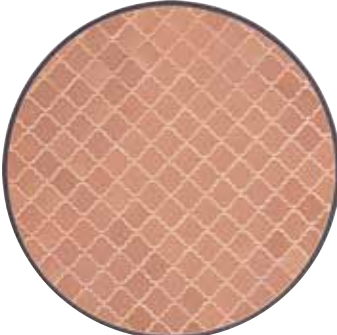

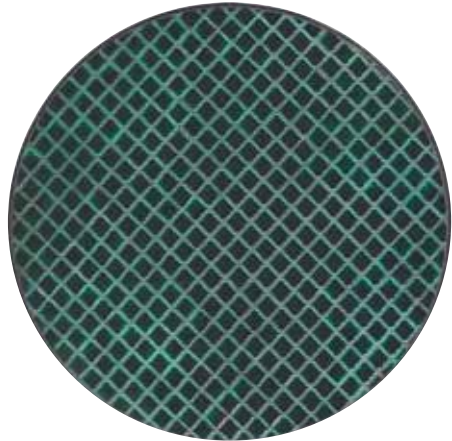

hiss coffee table

The clean lines of aluminum blend with the vibrant imperfection of handcrafted porcelain, creating a fascinating contrast between industrial material and traditional craftsmanship.

This coffee table collection is characterized by various dimensions, designed to enrich any lounge area, both indoors and outdoors. The combination of porcelain and aluminum colors allows for the creation of elegant and refined environments, seamlessly adapting to any space or style.

The small,
colorful flowers
of the net meet
the transparency
of glass
and
the warmth of wood.

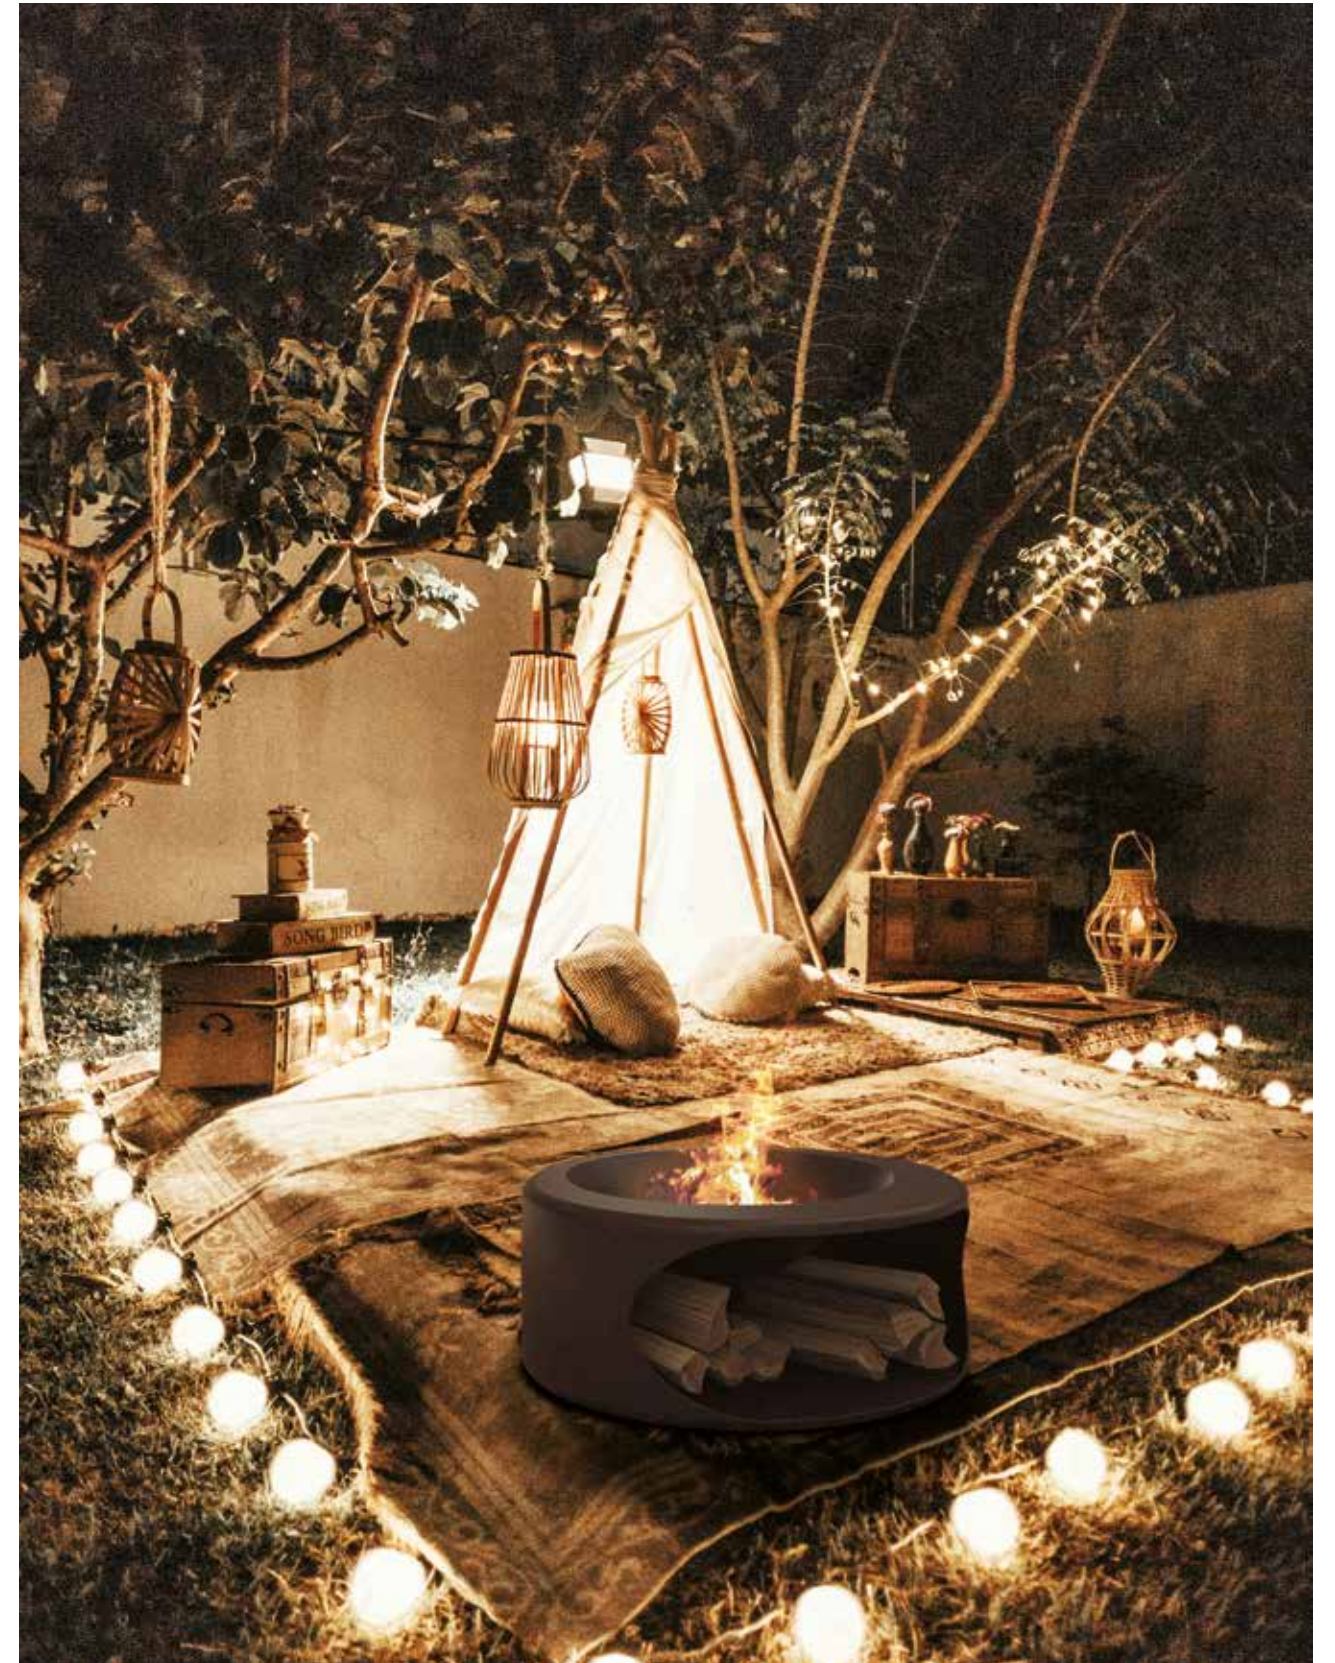

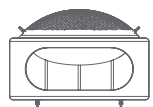

Also ideal for contract use, the SINI coffee table is available in three different sizes: Ø45 cm / 17.7", Ø75 cm / 29.5", and Ø100 cm / 39.4". The structure of the coffee table is made of natural teak wood, and the table top features a colored wire mesh, designed by our art directors, placed between two pieces of glass.

HARR

YAAZ Lab

The warmth
and
ambiance of
an open fire.

harr fire pit

HARR is a garden fireplace with a dome, crafted from stainless steel. The cover can be made from either stainless steel or decorative high-pressure laminate (HPL). Its circular shape enhances the primal charm of fire, providing warmth for both the body and the soul.

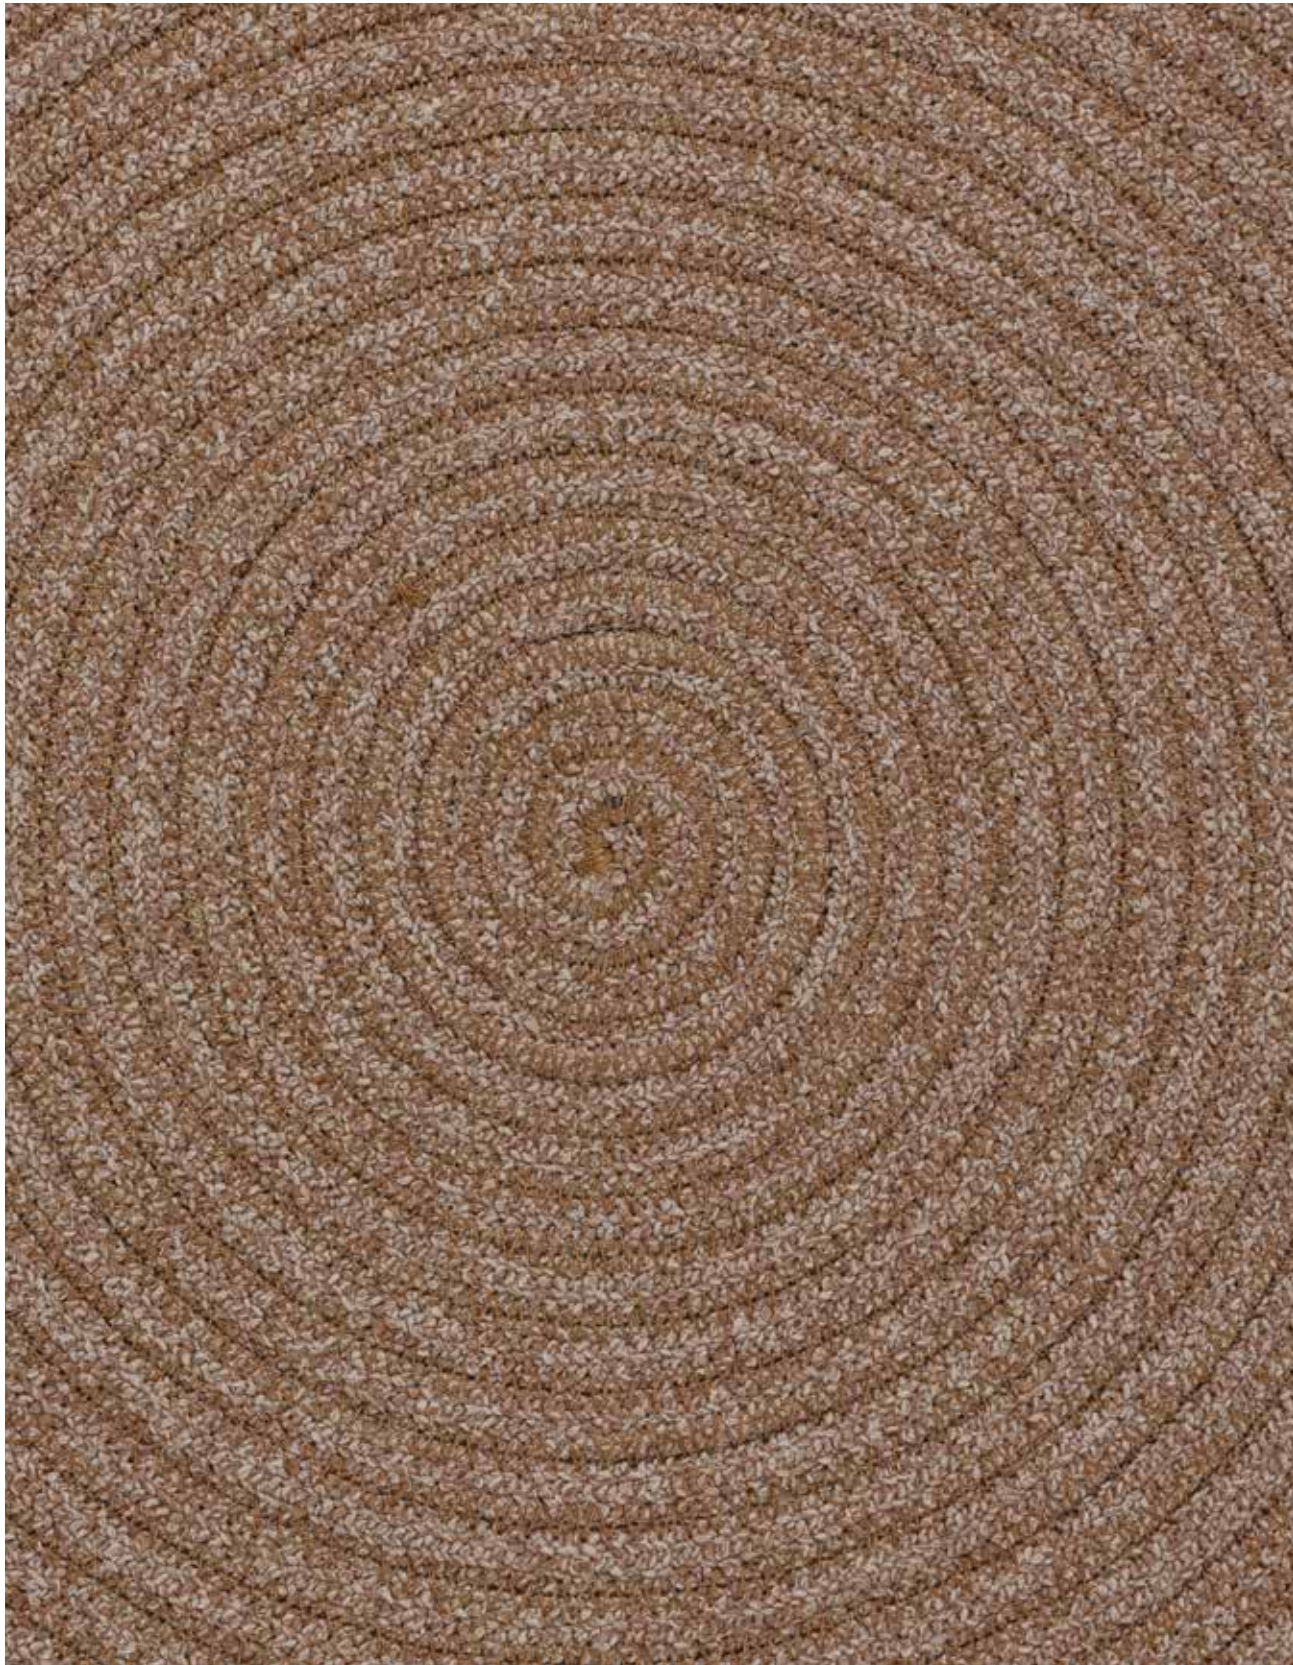

and coffee table

A top made of either Ment or Z-Pact is also available, transforming the brazier into a comfortable tabletop.

Outdoor carpets,
bringing elegance
everywhere.

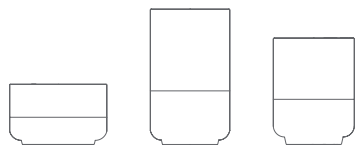

YAAZ Rope, which forms the structure of YUNN carpets, is a sustainably produced material that does not require water in its production. It is available in six different sizes and five different models, providing thermal insulation due to its low heat transfer. Additionally, its low coefficient of friction makes the carpet resistant to abrasion. With its hydrophobic structure, it absorbs minimal water and is resistant to moisture. Its high antibacterial properties help prevent the formation of unpleasant odors. It does not cause skin irritation or allergies, making YUNN both a safe and comfortable option.

The material
expressiveness
of natural
and coloured
terracotta.

The pure shape of the vases, available in four different colors and three sizes, enhances the sensory and tactile qualities of terracotta, an ancient material with timeless appeal. Please refer to the technical pages for more details.

sweet cushion/blanket

SWEET is available in a variety of colors and materials. The cushion is made from five Sunbrella fabrics in the catalog, with each outer color matched to a particular shade of the blanket. One of the six versions features printed fabric with the Sweet design on the outside, perfect for those seeking an accessory with a unique character. SWEET furnishing accessories are more than just a cushion and blanket combined; they represent a fantasy world where female creatures live in harmony with nature, free from separation, celebrating a fluid and balanced understanding.

Seeking
beauty
in
simplicity.

Quality is important in every environment, but in outdoor spaces, it becomes a fundamental reason for standing out in the market. This is why we use the best raw materials, as we believe it is both an ethical and sustainable choice. From this foundation, we have begun to build, selecting carefully calibrated finishes and color shades that focus on beauty—on the feelings of serenity that define a design approach in search of harmony. We draw inspiration from the colors of nature, which relax and nurture the need for silence and light, serving as an endless source of wellness and rootedness.

finishes & mood- boards

black and white emotions

Aluminium

Aluminium is a light and strong metal with excellent strength-to-weight ratio and corrosion resistance. These properties make it an ideal material for outdoor furniture. Despite its light weight, aluminium is durable and is coated with polyester electrostatic powder coating for added protection against knocks and scratches and to add colour to the product. As the powder coating adheres better to the metal, it also makes the product much more resistant to fading. JOTUN and Akzo Nobel branded powder coatings are used in YAAZ aluminium products.

JOTUN powder coatings used in YAAZ products have been tested against high amounts of UV radiation and strong winds. In addition, powder coatings have been tested in some of the hottest, most humid and corrosive environments in the world, such as Southeast Asia and the Middle East. In YAAZ aluminium products, 7001 series aluminium, which is especially preferred in the defence industry, is used. With its high hardness ratio, it is extremely resistant to all weather conditions (-50 / +50) and the effects of sand, dust and sea salt. As with other metals, aluminium can heat up or cool down depending on weather conditions, so it is recommended to use with a cushion for comfort.

Standard Composition: EN 573-3
Standard Properties: EN 755-2

Cleaning and Handling Instructions

For regular cleaning, wipe aluminium furniture with a soft cloth or sponge and a mild detergent solution. Avoid using steel wool or abrasive cleaners as they may scratch the aluminium surface. Rinse the furniture thoroughly with clean water and dry with a clean, dry cloth. To avoid damages such as dents and scratches on the surface of the product, use aluminium polish.

a warm colour life

YAAZ Rope

We have created a vibrant collection using our YAAZ ROPES. YAAZ ropes are produced from raw materials with OEKO-TEX, SGS, and UKAS International quality certificates, ensuring proven strength and high resistance to all weather conditions, along with UV color fastness. Our design team has carefully selected and produced a color palette that can be easily combined with our aluminum frame colors.

Outdoor furniture ropes made of durable acrylic-based raw materials provide superior protection against the sun’s harmful rays and harsh weather conditions.

The UV resistance and color fastness of the materials used are regularly tested in accordance with ISO 105-B04 standards.

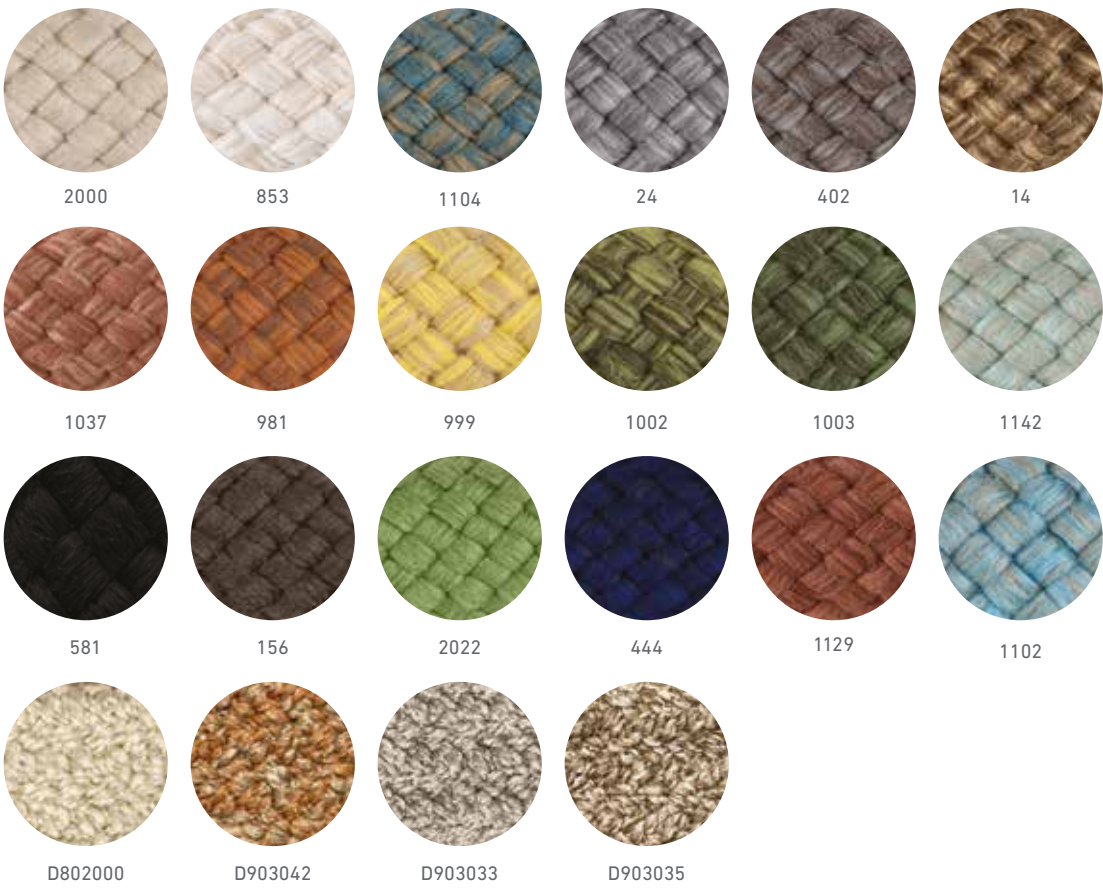

With a wide range of colors, outdoor furniture threads perfectly cater to your design needs.

Cleaning and Usage Instructions

Dust the rope furniture regularly with a soft cloth or sponge to remove light dirt or debris. For deeper cleaning, gently clean the rope with a solution of white soap and warm water using a soft sponge, then rinse thoroughly with clean water. Avoid harsh chemicals, as they can damage the rope and cause discoloration. After cleaning, allow the furniture to dry completely before using it again.

Avoid placing heavy objects on the furniture and refrain from putting weight on the drawstring parts to prevent rope sagging.

Additionally, avoid dragging or scraping the furniture on hard surfaces, as this may damage both the rope and the frame. It’s advisable not to use the furniture in extreme weather conditions, such as heavy rain or high winds, to prolong its lifespan. To extend the service life of the furniture, store it under a protective YAAZ cover when not in use.

The rope codes **D80200**, **D903042**, **D903033** and **D903035** are available only for YUNN carpets and the DENK collection

sweetly joyful

Teak

Teak wood is particularly well-suited for outdoor use due to its durability, robustness, and strength. The natural teak blocks we import from Myanmar are processed in our factory through all stages until they become finished products.

CLEANING AND USAGE INSTRUCTIONS

General: Moisture, wind, and heat can cause small cracks in the teak material, which is a natural behavior of a "living" material. The appearance and duration of these cracks depend on the humidity level in the air. Cracks that occur when the wood dries quickly tend to close when the humidity level increases. Dark spots or streaks are caused by moisture contained in the wood. The appearance of teak wood will generally even out during the first few weeks outdoors. Continuous exposure to atmospheric conditions may cause superficial oxidation (1-2 mm) of the wood, resulting in the characteristic silver-grey color. This oxidation does not affect the underlying structure and does not change its resistance to external factors.

In the first weeks of outdoor use, and with the initial rains, the wood may release red pigment due to its natural characteristics or micro-residues from processing. In such cases, it is recommended to wash the surface immediately with products suitable for the material. Under very humid conditions, teak wood may release a reddish-colored oil, and stains may appear on the surface. These stains can be treated as follows:

For normal cleaning, use a soft cloth (not microfiber), water, and a non-chemical cleaning agent.

For deep and difficult-to-remove stains, it is recommended to sand the surface evenly and polish it with a special product designed for the restoration of outdoor wooden furniture. This type of restoration product should not be used more than once a year.

To prevent oxidation of the product surface, apply a nourishing and protective oil regularly.

To remove the grey patina caused by oxidation and restore the original color of the teak, use a special restoration product every 2-3 years. After this process, wash the product with a non-chemical detergent, and after drying, apply an impregnating agent specifically made for outdoor wood.

IMPORTANT NOTES:

Do not use wire brushes, abrasive products, bleach, acids, or aggressive chemical solvents.

Avoid using pressure cleaners at close range or at high temperatures.

REGULAR MAINTENANCE:

For regular cleaning, wipe teak furniture with a soft cloth or sponge and a mild detergent solution.

To remove stubborn stains or accumulated dirt, use a teak cleaner or a mixture of vinegar and water. Apply the solution to the furniture with a soft-bristled brush, then rinse thoroughly with clean water. Allow the furniture to dry completely before reuse.

To preserve the natural color of teak wood, apply teak preservative or teak oil once or twice a year. This will help protect the wood from the elements and prevent it from turning grey.

USAGE GUIDELINES:

Do not place hot objects directly on teak furniture, as this can cause heat marks or discoloration.

Avoid placing heavy objects on the furniture, as this can cause warping or cracking over time.

Do not drag furniture over rough or uneven surfaces, as this can scratch or damage the wood.

If possible, store the furniture indoors or under a YAAZ protective cover when not in use to prolong its lifespan.

deep breath

Ment

High-strength terrazzo plates are produced using the highest quality natural stones. A first-class appearance is achieved with homogeneous color and aggregate distribution across large surfaces. Ment plates offer extensive design possibilities in spaces, with resistance to color fading and an unlimited range of colors and dimensions, making them especially suitable for outdoor use. In terms of sustainability, the water used in the production of Ment is recycled and reused. The precast material is made from natural aggregates, providing heat and energy savings through its long-term thermal heat retention and slow-release features. In YAAZ Ment products, epoxy synthetic resin is used as a binder instead of cement, making them resistant to staining during daily use.

Cleaning and Usage Instructions

For daily cleaning, simply wipe the surface with a clean, damp cloth to remove dirt and grit. If not cleaned regularly, sand and soil residues that can accumulate on outdoor Ment products may act as abrasives and damage the surface. Only use neutral liquid cleaners (neither acidic nor alkaline). For best results, opt for a commercial cleaner specifically designed for terrazzo. Avoid using all-purpose household cleaners, soaps, detergents, and wax cleaners, as these often contain one or more alkalis that can be harmful to Ment surfaces.

Perforated Sheet

Our perforated sheets made of aluminium are shaped by CNC machines in our factory, featuring patterns specially designed for YAAZ.

Cleaning and Handling Instructions

For regular cleaning, wipe the aluminium furniture with a soft cloth or sponge and a mild detergent solution. Avoid using steel wool or abrasive cleaners, as they may scratch the aluminium surface. Rinse the furniture thoroughly with clean water and dry it with a clean, dry cloth. To prevent damage such as dents and scratches on the surface of the product, it is recommended to use aluminium polish.

spice rose

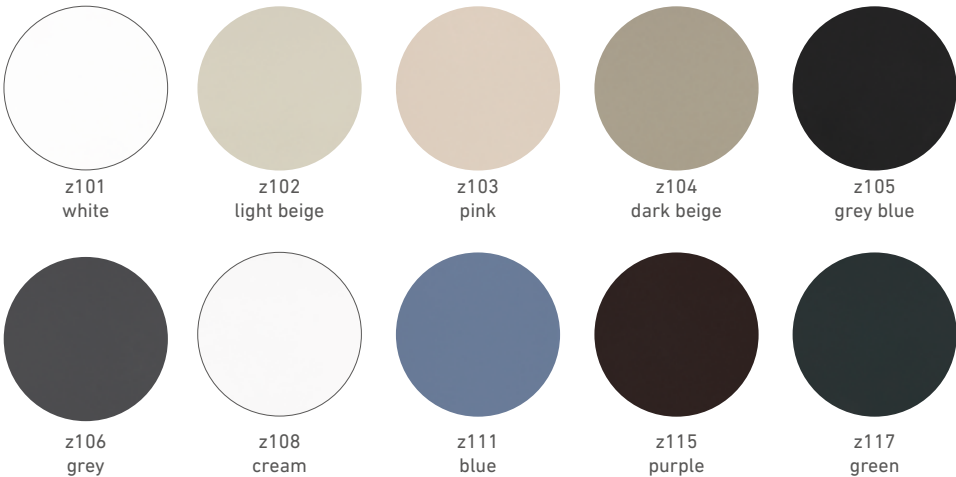

Z-pact - HPL

Z-pact PST surface technology boasts superior features such as being fingerprint-free, offering an ultra-matt surface with a soft touch, and minimizing light reflection thanks to its ultra color intensity. It is easy to clean and resistant to both household and laboratory chemicals. Additionally, it provides safe food contact due to its anti-bacterial properties and exhibits high heat and cold resistance. The long-lasting nature of the material is attributed to its micro-scratch, impact, and abrasion resistance, along with thermal improvement repair, flame retardant, and water-repellent properties. Reinforced with pine organic polymer (lignin), Z-pact-HPL has an elegant appearance and is extremely hard, making it especially ideal for outdoor applications. Lignin is a complex organic polymer found in the cell walls of many plants, contributing to their toughness and woodiness.

Cleaning and Using Instructions

For cleaning and usage instructions, certain cleaning agents should not be used, including abrasive scrubbing liquids, abrasive scrubbing solids, steel wool, abrasive sponges, and cleaners with low acidic or high alkali values. The surface of Z-Pact has low light reflectivity, and using cleaning materials containing abrasives or unsuitable agents may permanently damage the surface. To clean, apply a suitable cleaning liquid to a damp, non-abrasive cloth and wipe the surface. Wait for 5 minutes after cleaning, ensuring the cleaning fluid does not remain on the surface for more than 30 minutes. Then, wipe the surface with a clean cloth to ensure no residue remains. YAAZ will not accept liability for any damage caused by improper use of the cleaning fluid or cleaning procedure, and users are responsible for following the instructions for the cleaning materials used.

sky and see

Straps

The straps used in the UZ collection are specially designed with YAAZ ROPE raw material and production methods. The chosen colors are determined by color engineers to complement the wood and fabric collections.

Cleaning and Using Instructions

Dust the rope furniture regularly with a soft cloth or soft sponge to remove light dirt or debris. For deeper cleaning, gently clean the rope with a solution of white soap and warm water using a soft sponge. Then rinse thoroughly with clean water. Harsh chemicals can damage the rope and cause discolouration. Do not use. After cleaning, allow the furniture to dry completely before using it again.

Avoid placing heavy objects on the furniture and do not put weight on the drawstring parts of the furniture to avoid rope sagging. Avoid dragging or scraping the furniture on hard surfaces as this may damage the rope and frame. Avoid using the furniture in weather conditions such as heavy rain or high winds as this will prolong its life. To prolong the service life of the furniture, store it under protective YAAZ cover when not in use.

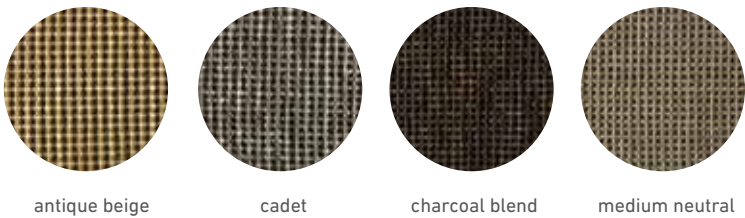

Bands

The bands used in the Monte collection are flexible straps produced by an Italian brand. The selected colors have been determined by color engineers to complement the wood and fabric collections.

Cleaning and Using Instructions

Dust the rope furniture regularly with a soft cloth or soft sponge to remove light dirt or debris. For deeper cleaning, gently clean the rope with a solution of white soap and warm water using a soft sponge. Then rinse thoroughly with clean water. Harsh chemicals can damage the rope and cause discolouration. Do not use. After cleaning, allow the furniture to dry completely before using it again. Avoid placing heavy objects on the furniture and do not put weight on the drawstring parts of the furniture to avoid rope sagging. Avoid dragging or scraping the furniture on hard surfaces as this may damage the rope and frame. Avoid using the furniture in weather conditions such as heavy rain or high winds as this will prolong its life. To prolong the service life of the furniture, store it under protective YAAZ cover when not in use.

colors and fragrances of nature

Porcelain

Porcelain, which is among the types of ceramics, stands out as the most valuable product for your space due to its durability, special compactness, and resistance to external factors. Its integrity with the glaze provides resistance to staining. This material is extremely resistant to chemical and atmospheric substances, and since it is fired at high temperatures, it is highly resistant to frost and temperature changes due to its water-repellent feature. It is a long-lasting outdoor material, known for its high resistance to abrasion and staining.

Cleaning and Using Instructions

As a water-repellent material, it will not be prone to staining. It is sufficient to wipe away any liquid spilled on the surface with a clean, soft cloth. Since porcelain products are entirely handmade, a slight crack appearance that may occur over time is natural and is not considered a defect.

Coating Concrete

The stone-effect paint collection, developed using the cement spraying method, offers a great alternative for aesthetic surfaces in outdoor products.

Cleaning and Using Instructions

Over time, exposure to the elements may cause powder coatings to show signs of weathering, such as loss of gloss, chalking, and slight color changes. Regular cleaning will minimize the effects of weathering and remove dirt, grime, and other build-up detrimental to all powder coatings. Users must be aware of any local regulations or requirements necessary to achieve conformance to published quality labels or standards. Records of all cleaning schedules and frequencies should be maintained and made available to YAAZ upon request. Failure to comply with the recommended cleaning schedule will void any warranties.

Cleaning should begin at the time of product installation, ensuring that construction materials like concrete, plaster, and paint splashes are removed before they dry. If these materials are not removed early, aggressive cleaning methods may be required, potentially damaging the powder-coated surface.

Coating Concrete products are best cleaned by regularly washing the surface with warm water and a non-abrasive, pH-neutral detergent solution. After cleaning, surfaces should be rinsed thoroughly to remove all residue. Use a soft cloth, sponge, or a soft natural bristle brush for cleaning. If the project is exposed to hazardous environmental factors, or is near salt water, an estuary, or marine environments, YAAZ must be consulted on a project-by-project basis. Renovation may be required in cases of heavy soiling due to a lack of maintenance, and it is recommended to consult YAAZ in such instances.

Usual maintenance can be performed using water with a mild detergent (pH 5 to 8). If atmospheric pollution has caused heavy soiling of the coating, some stains or marks may require stronger household products. In such cases, always dilute these products and test small, inconspicuous areas first. Under no circumstances should abrasive cleaners, polishes, or cleaners containing ketones or esters be used.

seduction of the desert

Natural Ceramic

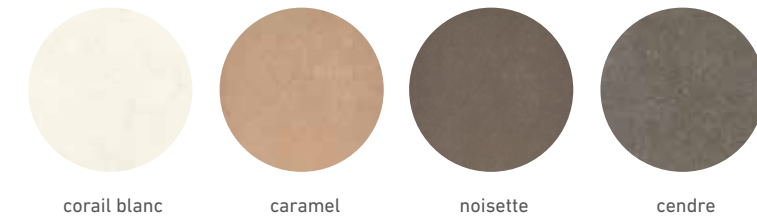

Natural Ceramic is opaque and has a tactile quality. This surface has a slightly burnished look that makes it soft and inviting. Careful selection of high-quality raw materials creates a surface with delicate color effects and an extraordinary illusion of depth.

POWERFUL ACTION

Eliminates microbes and prevents their reproduction 24 hours a day, with and without sunlight, providing always-active protection. Thanks to the technology permanently integrated into the product, it offers eternal effectiveness. The reinforcing fiberglass mesh adds extraordinary resistance. Highly eco-friendly, it uses less raw materials, resulting in lower water and energy consumption and reduced CO2 emissions.

Cleaning and Using Instructions

Use warm water and a high-quality microfibre cloth. If needed, use warm water with a very diluted neutral detergent (one cap in 5 litres of water). When finished, always rinse with water and a clean microfibre cloth.

fabrics

-  Bleach cleanable
-  Breathable comfort
-  Mold / mildew resistant
-  Water & stain resistant
-  Sun protection
-  UV / fade resistant

Sunbrella Fabrics

Outdoor fabrics made of acrylic fiber are strong and resistant to various weather conditions as well as handling issues such as mold, scuffing, and tearing. This durability is especially important for outdoor upholstery in both active residential and commercial applications. Before weaving, the acrylic fabric yarns are solution-dyed, allowing the fabric to retain its color longer, even when exposed to direct sunlight. In addition to water repellency, acrylic fabrics are more breathable than other options, helping the fabric stay cooler in hot weather.

Sunbrella acrylic fabrics are considered premium for outdoor textiles, particularly in terms of UV protection. Sunbrella fabrics last longer compared to their counterparts, offering long-term savings. Traditional dyeing processes only leave color on the surface of the fiber, which can easily fade. In contrast, Sunbrella fibers are saturated to the core with highly UV-stable pigments, making Sunbrella fabrics resistant to fading and the degrading effects of sunlight.

All Sunbrella fabrics are engineered to resist mold and mildew. If exposure to dirt and debris leads to mold and mildew growth, all Sunbrella fabrics can be easily and safely cleaned with bleach.

Cleaning and Using Instructions
****Please observe the washing instructions label inside the cushion.**

To facilitate the daily care of your Sunbrella fabric: remove loose dirt with a sponge and spray with a cleaning solution of water and mild soap. Allow the cleaning solution to penetrate the fabric, then rinse thoroughly until all soap residue is removed and air dry. Do not use bleach or fabric softeners, as these can damage the fabric and affect its water-resistant properties. If the fabric gets wet, allow it to dry completely before use to prevent mold growth. You can machine wash the fabric in cold water on a gentle cycle using a mild detergent. If ironing is necessary, use a low heat setting and a press cloth to avoid direct contact with the fabric. Protect furniture covered with the fabric from inclement weather such as rain, snow, and extreme temperatures by storing it under YAAZ covers.

YAPA Fabrics

The YAPA fabric collection, specially produced by YAAZ, is strong, durable, and easy to maintain. This collection is designed to align with the latest trends, showcasing a contemporary look that combines softness and comfort akin to the best indoor fabrics, while also offering the strength and durability of outdoor fabrics due to its waterproofing, which provides protection against all environmental factors.

Cleaning and Using Instructions
****Please observe the washing instructions label inside the cushion.**

Mix warm water with mild soap or a specialized cleaner designed for marine leather surfaces. To remove stains, use a specially formulated leather cleaner or a lightly dampened cloth. Regularly moisturize your leather products and care for them with a protective leather cream or polish to maintain suppleness and shine. Avoid exposing the furniture to extreme temperatures, such as direct sunlight or freezing conditions. Do not use abrasive materials or harsh chemicals when cleaning, as they can damage the marine leather. To prevent scratches or tears, avoid dragging heavy objects across the surface of the furniture. Consider covering the furniture during prolonged periods of non-use, such as winter months or when you are away on vacation. Regularly inspect the furniture for any signs of damage or wear and address any issues promptly to prevent further damage.

Serge Ferrari Sling / Mesh

Fabrics meet the need for sensorial comfort thanks to their soft touch, textile look, and contemporary design. The high level of technical performance of the fabrics guarantees the durability of the furniture. Batyline Elios is a time-tested fabric.

Cleaning and Using Instructions

Brush off any loose dirt or debris from the surface of the fabric using a soft-bristled brush. Apply a solution of water and mild soap to the fabric with a sponge or soft cloth. Gently scrub the fabric in a circular motion, taking care not to rub too hard.

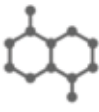

Softness and comfort

The flocked yarn in the weave ensures the fabric’s softness and comfort.

Robust

High-performance Batyline fabric with exceptional abrasion resistance properties (50,000 Martindale test cycles) for cushioning or tensioned installation (sling) applications.

Easy cleaning

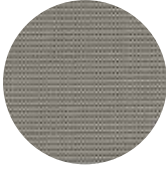

Batyline Elios is an excellent solution for outdoor furniture, combining durability and easy cleaning.
