

TURTLE COLLECTION

COFFEE TABLE

by YAAZ Lab | 2021

Item code: Turtle.32
(Turtle.32.s09.z10.r45)

Collection

The TURTLE collection includes a rocking armchair, small lounge chair, chair, stool, table, bar table, coffee table, and patio daybed.

The collection features a simple design that evokes the warmth and comfort of cherished memories, such as a cozy crib or a mother's embrace.

The chair is constructed entirely from aluminum, making it durable enough to withstand extreme weather conditions.

BEIGE GREY

Aluminum is a light weight and strong metal with an excellent strength-to-weight ratio and corrosion resistance. These properties make it an ideal material for outdoor furniture. Although aluminum is the most popular material for outdoor furniture, despite being light weight, it is durable and can be easily processed into various complex shapes.

Z-PACT

Decorative High Pressure Laminate

ALUMINUM

Aluminium is a light and strong metal with excellent strength-to-weight ratio and corrosion resistance. These properties make it an ideal material for outdoor furniture. Despite its light weight, aluminium is durable and is coated with polyester electrostatic powder coating for added protection against knocks and scratches and to add colour to the product. As the powder coating adheres better to the metal, it also makes the product much more resistant to fading. JOTUN and Akzo Nobel branded powder coatings are used in YAAZ aluminium products.

ALUMINUM COATING

JOTUN powder coatings used in YAAZ products have been tested against high amounts of UV radiation and strong winds. In addition, powder coatings have been tested in some of the hottest, most humid and corrosive environments in the world, such as Southeast Asia and the Middle East.

CONCRETE COATING

The stone effect paint collection, developed with the cement spraying method, offers a great alternative for aesthetic surfaces in outdoor products.

Cleaning and Using Instructions

Over time with exposure to the elements, powder coatings may show signs of weathering such as loss of gloss, chalking and slight colour change. A simple regular clean will minimize the effects of weathering and will remove dirt, grime and other build-up detrimental to all powder coatings.

For any particular region or territory, there may be local regulations or local requirements to be met in order to achieve conformance to certain published quality labels or standards. It is the users' responsibility to be aware of such standards.

Failure to comply with the recommended cleaning schedule will nullify any warranties.

Cleaning should start at the time the products are installed, ensuring that construction materials such as concrete, plaster and paint splashes are removed before they have a chance to dry. Failure to remove these materials at this early stage will require the use of aggressive cleaning materials and techniques with potential damage to the powder coated surface.

Best cleaned by regularly washing the coating using warm water and a non-abrasive, pH neutral detergent solution. Surfaces should be rinsed thoroughly after cleaning to remove all residue. All surfaces should be cleaned using a soft cloth or sponge or something harder than a soft natural bristle brush.

If the project is subject to any hazardous unusual environmental factors, or is close to salt water, an estuary or marine environments then YAAZ must be consulted on an individual project basis.

Renovation can be required in the case of heavy soiling (due to lack of maintenance).

In no circumstance should any abrasive cleaner or polish, or any cleaner containing ketones, esters be used.

Z-PACT

Superior features of Z-Pact surface technology;

Non-finger printing surface

Soft-touch ultra-matte finish

Low light reflection due to ultra-color density

Easy to clean

Resistance to house hold and laboratory chemicals

Anti-bacterial properties for safe food contact

High heat resistance and temperature/cold resistance

Long-lasting durability thanks to micro-scratch, impact and abrasion resistance, thermal healing repair, flame retardant, and water repellent properties

Zero-HPL, which is reinforced with pine or ganic polymer(lignin), has a stylish appearance and is extremely hard.

Thanks to these superior properties, Zero-HPL is ideal for outdoor applications.

Lignin is a complex organic polymer that builds up in the cell walls of many plants, making them hard and woody.

Cleaning and Using Instructions

Simply using a damp cloth is enough to clean our compact products.

Cleaning materials with chemicals can cause the surface polish to wear off over time and reduce its protective effect.

Avoid exposing the furniture to extreme temperatures, such as direct sunlight or freezing temperatures.

Do not use abrasive materials or harsh chemicals when cleaning the furniture, as they can damage the compact surface.

To prevent scratches or chips, avoid dragging heavy objects across the surface of the furniture.

Consider covering with YAAZ cover, the furniture during prolonged periods of non-use, such as during the winter months or when you are away on vacation.

Regularly inspect the furniture for any signs of damage or wear, and address any issues promptly to prevent further damage.
